

Smart Services PDX Reports Increased Demand for Landscape Lighting as Outdoor Living Investments Rise

May 20, 2026

Damascus, OR - May 20, 2026 - PRESSADVANTAGE -

Smart Services PDX, a Damascus-based landscaping company serving the Portland Metro area for over two decades, reports a significant uptick in requests for outdoor lighting installations as homeowners continue to invest in extending their living spaces beyond traditional indoor boundaries.

The company has observed a notable shift in client priorities, with more property owners viewing their outdoor areas as essential extensions of their homes rather than simple yards. This trend has driven increased interest in professional landscape lighting solutions that enhance both functionality and aesthetic appeal of outdoor spaces after dark.

Smart Services PDX landscape lighting installations have become increasingly sophisticated, incorporating energy-efficient LED technology and smart controls that allow homeowners to adjust their outdoor ambiance with precision. The company specializes in creating layered lighting designs that highlight architectural

features, illuminate pathways for safety, and showcase garden elements while maintaining environmental responsibility.

"The demand for professional landscape lighting has grown substantially as homeowners recognize how proper illumination transforms their outdoor spaces into usable areas throughout the evening hours," said Alberto, a spokesperson for Smart Services PDX. "We're seeing clients who want to maximize their property investment by creating outdoor environments that function as true living spaces, complete with ambient lighting for entertaining, task lighting for cooking areas, and accent lighting that highlights their landscape features."

The trend reflects broader changes in how people use their properties, particularly as remote work arrangements have made home environments more central to daily life. Outdoor spaces equipped with professional lighting systems extend usability well into evening hours, effectively adding functional square footage to properties without traditional construction costs.

Smart Services PDX has responded to this demand by expanding its lighting design capabilities, offering comprehensive solutions that integrate with existing landscape features. The company's approach emphasizes sustainable practices, utilizing native plants that require minimal water alongside eco-friendly irrigation systems, creating cohesive outdoor environments that function efficiently day and night.

The company's lighting installations range from subtle pathway illumination to dramatic uplighting of mature trees, with each project tailored to complement the specific architecture and landscape design of the property. Modern LED technology has made these installations more accessible, offering longer lifespans, reduced energy consumption, and minimal maintenance requirements compared to traditional lighting options.

Beyond aesthetic considerations, professionally designed landscape lighting addresses practical concerns including security, safety, and property value enhancement. Strategic placement of fixtures can deter intruders while ensuring safe navigation of outdoor spaces, particularly important for properties with elevation changes, water features, or complex hardscaping.

Smart Services PDX brings over 20 years of experience to each project, offering comprehensive outdoor services including landscape design, construction, and maintenance alongside specialized installations such as irrigation systems and retaining walls. The company serves both residential and commercial clients throughout the Portland Metro area, maintaining a commitment to treating each client with personalized attention while implementing sustainable practices that benefit both property owners and the environment.
