

Crestwood Cabinetry Introduces Enhanced Functional Storage Features in Custom Cabinet Designs

May 19, 2026

HAGER CITY, WI - May 19, 2026 - PRESSADVANTAGE -

Crestwood Cabinetry continues to deliver innovative storage solutions that maximize functionality while maintaining beautiful design across Southeast Minnesota and Western Wisconsin. The company incorporates specialized features such as pull-out organizers, integrated benches, and purpose-built laundry systems into its custom cabinet projects for both homes and businesses.

These practical enhancements address everyday organizational challenges. Pull-out Lazy Susans, spice racks, knife drawers, and tray systems improve accessibility in kitchens, while specialized bases accommodate range appliances or vessel sinks with custom plumbing notches. Such details transform standard cabinets into highly efficient workspaces tailored to individual lifestyles.

The company's showroom highlights several standout examples. The quartersawn oak kitchenette demonstrates premium construction with granite tops, under-mount sinks, and convenient pull-outs. The blue painted kitchenette showcases raised panel doors, gold hardware, and chiseled-edge countertops for an elegant yet functional look. Distressed finishes incorporate knife pullouts, roll-out trays, and multi-tier drawer storage, proving that style and utility can coexist seamlessly.

Laundry room solutions represent another area of focus. Custom setups include dedicated basket storage, farmhouse-style sinks, and durable soapstone countertops designed specifically for household tasks. These installations turn often-overlooked spaces into organized, efficient areas that support daily routines.

A signature innovation is the Stow-Away Bench, which combines seating with hidden storage through a lift-up top and front-opening compartment. Built to match any cabinet style, it provides additional organization without sacrificing aesthetics ? ideal for entryways, mudrooms, or kitchens.

"Adding smart features like pull-outs and specialized storage turns good cabinets into truly exceptional ones that clients use every day," said Jake Hinrichs, owner of Crestwood Cabinetry. "We listen to how families and businesses actually use their spaces and build solutions that make life simpler and more organized."

Commercial clients benefit from a similar thoughtful design. Projects have included custom sales desks and back counters for businesses, as well as full bars for event centers. These installations emphasize durability, workflow efficiency, and seamless integration with existing environments while incorporating functional details that enhance daily operations.

Refacing services allow existing cabinetry to gain modern functionality. New doors, drawer fronts, and hardware can be paired with upgraded interior organizers, offering a cost-effective way to modernize storage without full replacement.

The design process prioritizes client collaboration. Homeowners and business owners work directly with the team to select wood species, finishes, hardware, and specialized components. This ensures every project ? whether a full custom kitchen, bathroom vanity, or commercial fit-out ? meets exact needs while staying within budget. Free estimates provide clear guidance from the initial consultation.

Material selections balance quality, appearance, and performance. Options range from rustic barnwood sourced from premium suppliers to painted finishes and solid hardwoods. Construction methods focus on long-term durability, with attention to details like full-overlay doors, dovetail drawers, and precise integration elements such as base shoes.

Clients frequently highlight the practical impact of these features. Matching new additions to existing cabinets, creating cohesive looks in historic homes, or designing efficient commercial workspaces all demonstrate the company?s versatility. The emphasis on real-world usability sets Crestwood Cabinetry apart in delivering cabinets that not only look exceptional but perform effectively over time.

As homeowners and organizations seek smarter ways to organize their spaces, demand grows for cabinets

that go beyond basic storage. Crestwood Cabinetry responds with designs that incorporate innovative features while preserving the custom, client-driven approach that has defined its work for more than 20 years.

The company serves residential and commercial clients throughout the region, offering complete services from initial design through professional installation. This end-to-end involvement ensures smooth project execution and results that exceed expectations in both form and function.

Crestwood Cabinetry provides custom cabinetry services for homes and businesses in Southeast Minnesota and Western Wisconsin. With more than 20 years of experience, the company specializes in kitchen cabinets, bathroom cabinets, commercial installations, and cabinet refacing solutions that incorporate functional storage innovations.
