

ATC Cooling & Heating Highlights 36 Month Labor Warranty as Tri-Cities Residents Prepare for Temperature Extremes

May 22, 2026

KINGSPORT, TN - May 22, 2026 - PRESSADVANTAGE -

ATC Cooling & Heating, a residential and light commercial HVAC contractor serving the Tri-Cities area, is emphasizing the importance of reliable heating and cooling systems as the region experiences its characteristic temperature swings between cold mornings and warm afternoons. The company's comprehensive warranty program, which includes a 36-month labor warranty on new equipment installations, addresses growing concerns about system reliability during seasonal extremes.

The Tri-Cities region, encompassing Kingsport, Johnson City, and Bristol, experiences unique weather patterns due to its elevation in Eastern Tennessee. Cold mornings quickly transition to warm afternoons, while summer months bring intense humidity with temperatures reaching the mid-90s. These conditions place significant demands on residential and commercial HVAC systems, making proper installation and maintenance critical for year-round comfort.

"Eastern Tennessee's climate creates real challenges for homeowners trying to maintain comfortable indoor temperatures," said Nathan Schmitt, President and Owner of ATC Cooling & Heating. "We see everything from freezing mornings that require robust heating to sweltering afternoons that demand efficient cooling, often within the same day. Our 36-month labor warranty gives customers peace of mind knowing their investment is protected through multiple seasons of these extreme temperature variations."

ATC Cooling & Heating specializes in various HVAC solutions designed to address the region's climate challenges, including geothermal systems, ductless heat pumps, traditional furnaces, and advanced zoning controls. The company's expertise extends to solving common regional issues such as uneven cooling between rooms or floors, humidity control problems, and noise concerns from outdoor units.

The demand for reliable HVAC services has intensified as more residents recognize the importance of properly functioning systems during temperature extremes. The company's official business listing shows consistent positive feedback from customers throughout the Tri-Cities area, with particular emphasis on the technical expertise and responsiveness of their service team. The company maintains a 4.8-star rating based on extensive customer reviews.

Geothermal systems have emerged as a particularly effective solution for the region's variable climate. These systems utilize the earth's stable temperature to provide both heating and cooling, offering energy efficiency advantages that appeal to homeowners facing both winter heating and summer cooling demands. ATC Cooling & Heating has established itself as one of the few geothermal specialists in the area, working with all brands of geothermal equipment.

"The technology available today allows us to create customized solutions for each home's specific challenges," added Schmitt. "Whether it's implementing forced air zoning, installing mini-split systems, or designing complete geothermal installations, we can ensure consistent comfort regardless of outdoor conditions."

ATC Cooling & Heating's YouTube channel demonstrates both their deep knowledge of HVAC and their commitment to serving the entire Tri-Cities area, from Abingdon, Virginia to Limestone, Tennessee. With over 50 years of combined experience in the HVAC industry, ATC Cooling & Heating continues to expand its service offerings to meet evolving customer needs, including indoor air quality improvements, ventilation system upgrades, and energy-efficient equipment installations.

ATC Cooling & Heating is a family-owned HVAC contractor providing residential and light commercial heating and cooling services throughout the Tri-Cities region. The company offers comprehensive installation,

repair, and maintenance services for all types of HVAC systems, backed by extensive warranties and financing options.
