

Big Sky Bounce Celebrates Nearly Two Decades as South Denver's Premier Event Entertainment Provider

May 22, 2026

CASTLE ROCK, CO - May 22, 2026 - PRESSADVANTAGE -

Big Sky Bounce, the South Denver event rental company founded by Edward Guns in 2005, marks over twenty years of providing party and event rental services with an inventory of entertainment options that extend far beyond traditional party rentals.

While many event rental companies focus primarily on bounce houses and basic inflatables, the company has built its catalog by offering attractions including Silent Disco systems, foam parties, giant building blocks, Lights Out Glow Party packages, Zorb balls, and a Draw Me Bot photo booth that creates live caricature-style drawings of guests.

"When I started this company in 2005, the vision was never to be just another bounce house rental service," said Edward Guns, founder of Big Sky Bounce. "We recognized early that event hosts wanted memorable experiences their guests had never seen before, and that philosophy has driven every decision about expanding our inventory over the past two decades."

The company serves Castle Rock, Parker, Highlands Ranch, Centennial, Lone Tree, Littleton, Aurora,

Monument, Franktown, Larkspur, Greenwood Village, and surrounding Douglas County communities, providing event entertainment solutions for birthday parties, school functions, corporate events, and community festivals. Beyond its signature attractions, the company maintains a full selection of traditional party rentals including water slides, obstacle courses, and carnival games.

One of the company's most popular offerings, the Silent Disco service, provides wireless headphones with multiple music channels, allowing party hosts to create dance events without noise concerns. The foam party service, marketed as Big Sky Bubble, covers participants in mountains of safe, biodegradable foam for outdoor celebrations. The giant building blocks, oversized versions of classic construction toys, have become particularly popular at school events and corporate team-building functions.

"Schools and organizations looking for fundraising alternatives have responded well to our Run4Funds program," said Guns. "Combined with attractions like the Zorb balls and interactive obstacle courses, it helps schools create events that generate strong participation and revenue compared to traditional fundraisers."

The company also provides comprehensive event support services, including trained staff for setup, supervision, and teardown, as well as generators for venues requiring additional power. This full-service approach has established the company as a single-source solution for event planners throughout the South Denver region.

Big Sky Bounce continues to expand its offerings based on emerging entertainment trends and customer feedback. Recent additions to the inventory include a nine-hole portable mini golf course, a Hydro Blast Water Maze, and a Big Top 6-in-1 Carnival Game added in spring 2026.

Founded in 2005, Big Sky Bounce operates from South Denver and provides event rental services throughout the metro area. The company specializes in unique entertainment attractions alongside traditional party rentals, serving both residential and commercial clients with delivery, setup, and event management services.
