

BestCan Windows and Doors Named Among Top Five Window Replacement Companies in Ottawa Homeowner's Guide

May 22, 2026

NEPEAN, ON - May 22, 2026 - PRESSADVANTAGE -

BestCan Windows and Doors has been named among the top five window replacement companies in Ottawa in a recently published homeowner's guide evaluating local window and door contractors. The recognition reflects the company's decades-long track record of residential installations across the Ottawa region and adds to a growing list of third-party acknowledgments the company has received in recent years.

Homeowner guides of this nature typically evaluate companies across several criteria, including installation quality, customer satisfaction, warranty terms, and product selection. Inclusion among the top five positions, BestCan Windows and Doors, alongside a small group of contractors that met the guide's threshold for residential service standards. For property owners researching contractors before committing to a window or door project, third-party rankings serve as an independent reference point, separate from company-produced marketing materials.

BestCan Windows and Doors has operated as a family-owned business in the Ottawa market for more than five decades, accumulating more than 55,000 residential installations over that period. The company offers a range of window and door products for residential properties, including casement, double-hung, bay, bow, and sliding configurations, as well as entry door and siding services. Its long tenure in the local market has produced a volume of completed projects that few regional competitors can match. That consistency across ownership transitions and shifting market conditions underscores the operational stability that homeowners benefit from when selecting a contractor expected to honor long-term warranty commitments.

"Being recognized in guides like this reflects work that goes back years," said Sam Bailey, Owner of BestCan Windows and Doors. "Installations hold up, or they don't, and the record speaks for itself. For homeowners trying to sort through their options, that kind of third-party verification matters more than anything a company says about itself."

The Ottawa window replacement market has grown increasingly competitive in recent years, with a rising number of contractors offering residential services across the region. Homeowners evaluating their options often face challenges in distinguishing between companies with similar service descriptions but substantially different track records. Rankings and guides that apply consistent evaluation criteria provide one mechanism for narrowing the field before homeowners request quotes or begin the selection process.

As a recognized window replacement company in Ottawa, BestCan's inclusion in the guide also reflects its standing in the siding segment of the residential renovation market. The company's siding contractors in Ottawa operations cover a range of exterior cladding products and installation services, positioned as a complement to its window and door work. Homeowners undertaking exterior renovation projects often combine window replacement with siding updates, and BestCan's ability to handle both reduces the coordination burden of managing multiple contractors.

The ranking also arrives as Ottawa homeowners continue to prioritize energy performance in renovation decisions. Window replacement projects that upgrade from older single- or double-pane units to modern thermally efficient products can reduce heating and cooling costs over the long term. As energy-efficiency requirements tighten and utility costs remain elevated, the decision to replace aging windows has shifted from a cosmetic upgrade to a functional one for many property owners. BestCan's product lineup addresses this demand directly, offering thermally tested window and door options suited to Ottawa's climate extremes across both heating and cooling seasons.
