

daylight AG Software Company Enhances Educational Management Platform for Swiss Institutions in Winterthur

June 19, 2026

Winterthur, ZH - June 19, 2026 -
daylight AG - Schulverwaltungs-, Kursverwaltungs-, Prüfungsverwaltungs-, Event- & Rechnungswesen Software continues to strengthen its position as a comprehensive educational technology provider, offering enhanced digital solutions that address the evolving needs of Swiss educational institutions. The Winterthur-based company has refined its integrated platform to deliver more streamlined administrative capabilities for schools and training organizations across Switzerland.

The company's software platform combines multiple administrative functions into a single, modular system designed specifically for educational environments. The solution encompasses school administration, course management, examination processing, event coordination, and accounting operations, enabling institutions to manage their complete operational workflow through one unified interface. More about the company can be found at https://pressadvantage.com/organization/daylight-ag/.

Educational institutions throughout Switzerland face increasing pressure to modernize their administrative processes while maintaining focus on educational quality. daylight AG addresses these challenges by providing tools that automate routine tasks, improve data management, and reduce administrative overhead. The platform's modular architecture allows organizations to implement specific components based on their unique requirements, from small training providers to larger educational institutions.

The software's capabilities extend beyond basic administration to include sophisticated features such as automated registration management, resource allocation, and integrated financial accounting. Organizations can create online portals for course registration, manage participant data, coordinate resources, and handle billing processes through a single system. This integration eliminates data silos and reduces the potential for errors that often occur when using multiple disconnected systems.

Swiss educational institutions particularly benefit from the platform's compliance with local regulations and standards. The software accommodates multilingual requirements and integrates seamlessly with existing Swiss financial and administrative systems. This local expertise, combined with over 20 years of experience in the education sector, positions daylight AG as a trusted partner for Swiss schools and training organizations.

The company maintains its headquarters at Bahnhofplatz 12 in Winterthur, where its team continues to develop and refine the platform based on feedback from educational institutions across Switzerland. Additional information about daylight AG can be found at https://maps.app.goo.gl/FYDvnuHbdtTgjGRaA.

The platform's cloud-based architecture provides flexibility for institutions of varying sizes and technical capabilities. Organizations can choose between on-premises installation or cloud deployment, ensuring the solution fits within their existing IT infrastructure. The system's scalability allows institutions to expand functionality as their needs grow, without requiring complete system replacements.

Recent developments in educational technology have emphasized the importance of data-driven decision making in academic administration. daylight AG's platform provides comprehensive reporting and analytics capabilities, enabling administrators to track enrollment trends, monitor resource utilization, and optimize course offerings based on actual data rather than assumptions.

daylight AG - Schulverwaltungs-, Kursverwaltungs-, Prüfungsverwaltungs-, Event- & Rechnungswesen Software specializes in providing comprehensive software solutions for educational administration. The company serves schools, training organizations, and educational institutions throughout Switzerland with integrated digital tools designed to streamline operations and enhance educational management.
