

MGL Limo Worldwide Expands Jet Sprinter Fleet to Meet Growing Bay Area Corporate Demand

May 21, 2026

SAN RAMON, CA - May 21, 2026 - PRESSADVANTAGE -

MGL Limo Worldwide, a San Francisco Bay Area luxury chauffeur company, is expanding its premium ground transportation offerings with additional investment in its Jet Sprinter fleet and enhanced corporate and airport service capacity across the region. The expansion addresses increasing demand from Bay Area businesses and travelers seeking reliable alternatives to rideshare services for executive transportation needs.

The Burlingame-based company, which maintains a second location in San Ramon which together holds over 1,500 five-star Google reviews, is responding to market trends showing corporate clients and airport travelers increasingly choosing professional chauffeured ground transport over rideshare options for reliability, executive presentation, and group logistics.

The expanded Jet Sprinter fleet represents a strategic focus on premium group transportation. These vehicles seat eight passengers in a jet-style luxury interior, providing an ideal solution for executive teams,

roadshows, wine country tours, and VIP group travel where traditional sedans or SUVs lack capacity but full buses exceed requirements.

"Bay Area businesses and tech companies require transportation partners who understand the importance of punctuality, professionalism, and seamless logistics," said the CEO of MGL Limo Worldwide. "Our investment in expanding our Jet Sprinter fleet and service capacity ensures we can meet the evolving needs of corporate clients while maintaining the exceptional service standards that have earned us the trust of thousands of customers."

The company's corporate transportation services feature 24/7 live dispatch, streamlined account setup processes, fully licensed and insured operations, competitive corporate rates, and efficient scheduling systems designed for conferences, roadshows, and executive travel. These capabilities have positioned the company as a preferred partner for Bay Area businesses requiring dependable ground transportation solutions.

Airport operations represent another key area of expansion, with enhanced limousine service coverage for San Francisco International Airport, Oakland International Airport, and San Jose International Airport, including FBO private terminal service. The company utilizes state-of-the-art flight tracking software for real-time monitoring, provides complimentary meet-and-greet services, and sends email confirmations for every reservation to ensure seamless airport transfers.

The expansion extends across the company's primary service area encompassing San Francisco, Napa, Sonoma, Palo Alto, Sausalito, and surrounding communities, with nationwide and international chauffeur service also available through their global network.

The investment in fleet expansion and service enhancement comes as Bay Area transportation patterns continue evolving, with corporate clients prioritizing reliability and professional presentation for important meetings, events, and airport transfers. The Jet Sprinter vehicles particularly address a growing market segment requiring luxury group transportation for wine country excursions, corporate team outings, and multi-passenger airport transfers.

MGL Limo Worldwide operates as a comprehensive luxury ground transportation provider, offering services ranging from executive sedan and SUV transportation to larger capacity vehicles including executive sprinters and buses. The company specializes in corporate and business travel, airport transfers, hourly directed services, Napa Valley winery tours, San Francisco Bay Area tours, wedding transportation, and special occasion services.
