

PASCAL Unveils the Paradoxe Watch Collection, a Salvador Dalí-Inspired Take on Modern Diamond Watches

May 22, 2026

Los Angeles, CA - May 22, 2026 -

PASCAL has introduced the Paradoxe Watch Collection, a design-led watch line that brings surrealist influence, asymmetrical form, and diamond detailing into a distinctly modern luxury statement. Positioned as a collection for customers who want something more expressive than a conventional timepiece, the Paradoxe line reframes what a diamond watch can look and feel like in contemporary fashion.

According to the brand, the PASCAL Paradoxe Watch Collection draws on a Salvador Dalí-inspired visual language, using flowing, distorted forms to challenge the rigid symmetry that has long defined traditional watch design. Instead of treating watchmaking as a category ruled by predictable shapes, PASCAL uses the Paradoxe collection to present a more artistic interpretation of balance ? one where irregularity, proportion, and elegance can coexist on the same wrist.

The result is a collection that is intentionally different from the conventional luxury watch formula. Rather than

leaning on heritage cues or standard geometric cases, the Paradoxe line stands out for its melting, sculptural silhouette and its emphasis on visual tension. The collection is designed for customers who are drawn to modern fashion, directional accessories, and pieces that feel like a conversation starter without losing day-to-day wearability.

PASCAL describes the collection as an answer for people who want more than a watch that simply marks time. In the Paradoxe line, the watch becomes part of self-expression. Diamond accents are used not just as a signifier of luxury, but as a design device that guides the eye and enhances the shape of the case. This approach allows the collection to communicate luxury through intention and form, instead of relying only on traditional opulence.

The launch also aligns with a broader shift in consumer taste. As more shoppers look for fashion pieces that reflect individuality rather than conformity, categories like watches are being re-evaluated through a style lens rather than a purely technical one. PASCAL?s Paradoxe collection speaks directly to that demand. It offers a luxury watch option for those who appreciate art, asymmetry, and contemporary styling, while still wanting a piece that can function within everyday wardrobes.

PASCAL?s wider brand positioning in lab-grown diamond watches and jewelry gives the Paradoxe line additional context. The collection sits within a larger world of modern accessories designed to blend craftsmanship, responsible sourcing, and bold aesthetics. That background helps position Paradoxe not as an isolated experiment, but as part of the brand?s ongoing effort to push its watch direction beyond standard expectations.

The Paradoxe Watch Collection also gives media and consumers a strong narrative hook in a crowded market. Instead of presenting another polished but predictable dress watch, PASCAL is introducing a product family with a clear point of view. The Salvador PASCAL Dalí-inspired framing watch, the asymmetrical silhouette, and the emphasis on wearable artistic identity combine to make the collection easy to discuss, easy to visualize, and easy to distinguish from conventional diamond watch launches.

For stylists, editors, and shoppers alike, the collection?s appeal lies in that tension between boldness and usability. The pieces are distinctive enough to stand apart, yet refined enough to work within a real wardrobe. That balance gives the Paradoxe line relevance not only as an art-influenced release, but as a luxury watch category that customers can realistically wear beyond a single occasion.

With the debut of the Paradoxe Watch Collection, PASCAL is making a clear statement about where contemporary watch design can go next. Instead of choosing between tradition and expression, the brand is suggesting that modern customers increasingly want both ? quality and individuality, elegance and edge, timekeeping and visual identity. The Paradoxe line is PASCAL?s answer to that demand.

The collection is now available on the PASCAL website, where customers can explore the full Paradoxe range and learn more about the inspiration behind the design. Additional details about the collection can be found at the official PASCAL Paradoxe Watch Collection page.
