CCO Launches New Certified Inpatient Coder (CIC?) Exam Prep Course

April 22, 2016

April 22, 2016 - PRESSADVANTAGE -

Certification Coaching Organization, LLC (CCO), based in Oceanville, New Jersey, has officially announced the launch of a new medical coding course. The company's Certified Inpatient Coder or CIC? Review Blitz is now available for students to enroll in.

Laureen Jandroep, CPC, CPC-I, COC, CMSCS, CHCI, CPPM, founder and CEO of Certification Coaching Organization, states, "This course is designed for students who are seeking certification from the AAPC as a Certified Inpatient Coder, and we are pleased to finally have it ready for students to begin enrolling."

The CIC? credential, first offered in 2014, is an inpatient medical coding certification and the only certification dedicated exclusively to inpatient facility coding. Jandroep states that the course from Certification Coaching Organization helps review, refresh, and refine their understanding of the core material and essential tips to passing the corresponding Certified Inpatient Coder (CIC?) Exam.

The Certified Inpatient Coder (CIC?) Exam Prep course is now available on the company's site and Jandroep states, "We recommend that those interested in taking any of our courses take some time to look through the

specifics of each one, to determine which particular course is needed for their specific needs."

CCO offers a wide range of medical coding online courses, and Jandroep states that it can often be confusing for coders to determine which specific course they require for their certification. She says that the company offers guidance to those who need it, to ensure that they choose and enroll in the course that will best serve them in their future careers.

CCO has, to date, helped thousands of individuals to gain certification by offering a number of examination prep courses that help to fully prepare them for taking their certification exams. Those interested in learning more about the specific courses offered by the company can visit them on their official website.

CCO also provides a Facebook page for medical coders, where those working in the industry or anyone interested in learning more about the field can connect and speak with other coders. Jandroep states that the company's Facebook page is also used to update followers on other new courses as they are released.
