

Bromley All-On-4 Full Mouth Dental Implants Dentist Dr Mori Shahid Welcomes Appointments for Teeth Replacement Consultations at Smile 4 U Dental Practice

May 27, 2026

London Borough of Bromley, England - May 27, 2026 -
Smile 4 U - Bromley has announced the availability of consultation appointments for patients considering All-On-4 dental implants as a long-term option for replacing missing teeth. The practice, led by Dr Mori Shahid, is welcoming enquiries from individuals interested in restoring a complete arch of teeth through full mouth dental implants designed to improve function, appearance, and day-to-day comfort.

According to the practice, increasing numbers of adults are exploring modern tooth replacement treatments that provide greater stability than traditional removable alternatives. All-On-4 dental implants are commonly recommended for patients missing most or all teeth in the upper or lower jaw, particularly those seeking a fixed solution that closely resembles natural teeth in both appearance and function.

Smile 4 U - Bromley explained that All-On-4 implants involve securing a complete arch replacement onto a carefully positioned set of dental implants. This approach is intended to support a full row of replacement

teeth while reducing movement associated with removable dentures. Patients attending consultations are generally assessed individually to determine whether full mouth dental implants are suitable for their oral health needs and long-term expectations.

The practice noted that consultations often include a review of oral health, discussions regarding medical history, digital imaging where appropriate, and conversations about treatment stages and expected outcomes. Patients are also able to discuss concerns surrounding eating, speech, comfort, and confidence following tooth loss.

Professional insights regarding how All-On-4 dental implants in Coventry can help achieve a complete smile restoration in a lasting fashion can be found at: https://smile4u.co.uk/dentist-bromley-london/dental-implants/all-on-4-dental-implants/.

Smile 4 U - Bromley stated that many patients seeking treatment for missing teeth are interested in options capable of supporting both oral function and facial aesthetics over the longer term. Full mouth dental implants are frequently considered by patients who wish to regain greater stability when eating and speaking, while also improving the overall appearance of their smile.

The practice also highlighted the importance of personalised treatment planning before beginning implant procedures. Factors such as bone health, gum condition, existing dental concerns, and overall oral hygiene are commonly reviewed during the assessment process to ensure patients receive suitable recommendations.

Research supports the effectiveness of dental implants when proper protocols are followed. A 2025 study titled ?Outcomes of Dental Implants in Routine Clinical Practice: A Retrospective Multicenter Study?, published in the International Journal of Dentistry and coordinated in Milan, Italy, reported an implant survival rate of 99.9%. Conducted by Goker F, Mali Rai P, De Santis D, and colleagues, the study found that following guidelines ? including accurate diagnosis, personalised treatment plans, ongoing maintenance, and adherence to the implant system manufacturer?s recommendations ? led to satisfactory clinical and radiographic outcomes in routine dental practice. The findings further highlighted the importance of careful planning and ongoing follow-up in supporting long-term implant success.

Alongside All-On-4 dental implants, Smile 4 U - Bromley provides a broader range of dental implant treatments in Coventry for patients with single or multiple missing teeth. These treatments may include single tooth implants, implant-supported bridges, and other restorative approaches designed to improve oral function and smile appearance. The details of these treatments are available at: https://smile4u.co.uk/dentist-bromley-london/dental-implants/.

The practice explained that consultations are intended to help patients better understand the different options available before making decisions regarding treatment. Discussions may include expected treatment timelines, aftercare considerations, suitability for implant placement, and potential alternatives where appropriate.

Smile 4 U - Bromley also reported that some patients may undergo a consultation following long-standing problems with missing teeth, such as a loss of confidence, a limited diet or problems with removable dentures. The practice offers detailed discussions to give patients an idea of the possible restorative treatments and the expected results.

The dental team further stated that modern implant dentistry continues to evolve alongside improvements in digital imaging, treatment planning, and restorative techniques, helping practices provide more tailored approaches for individuals with varying dental needs.

General information about Smile 4 U - Bromley, its dental team, and other dental treatments besides dental implants, can be found at: https://smile4u.co.uk/dentist-bromley-london/.

The announcement reflects continued interest in full mouth dental implants among patients seeking longer-term solutions for extensive tooth loss. By welcoming appointments for All-On-4 implants and complete arch replacement consultations, Smile 4 U - Bromley continues to expand access to restorative dental treatments intended to support comfort, confidence, and improved oral function for patients across the local area.
