IntroDrink Expands Natural Health Products Portfolio for Swiss Wellness Market

June 09, 2026

Zurich, Zurich - June 09, 2026 -
IntroDrink, a leading Swiss online retailer of premium natural supplements and wellness products, has expanded its comprehensive portfolio to address growing consumer demand for science-backed natural health solutions across Switzerland. The expansion encompasses enhanced offerings in immune support, fitness nutrition, beauty supplements, and natural cosmetics, reflecting evolving wellness priorities among Swiss consumers.

The company's expanded range now features over 100 carefully curated natural health products, including adaptogenic herbs, bioavailable vitamins, plant-based proteins, and traditional natural cosmetics. This development comes as Swiss consumers increasingly prioritize preventive health measures and seek alternatives to synthetic supplements.

IntroDrink's immune system support category has seen particular growth, featuring products such as Beta-Glucan, Echinacea, Propolis, and Elderberry extracts. The company has also strengthened its beauty

and anti-aging segment with collagen peptides, hyaluronic acid, and astaxanthin supplements, addressing the rising interest in natural beauty-from-within approaches.

The fitness and performance nutrition line has been enhanced to serve Switzerland's active community, offering clean supplements including creatine, branched-chain amino acids, L-carnitine, and plant-based protein options. These products cater to athletes and fitness enthusiasts seeking natural performance enhancement without synthetic additives.

A notable addition to the portfolio includes traditional natural cosmetics, featuring tallow-based skincare, Aleppo soap, and organic oils such as argan and jojoba. These products reflect a return to traditional skincare methods combined with modern quality standards.

The company has also introduced specialized wellness bundles targeting specific health goals, including immune power, beauty glow, detox, and energy packages. These curated combinations provide consumers with comprehensive solutions based on complementary natural ingredients.

IntroDrink's detox and cleansing category features chlorella, spirulina, zeolite, and liver support formulas, addressing the growing awareness of environmental toxins and the importance of regular detoxification. The sleep and relaxation segment includes natural solutions such as ashwagandha, valerian, and L-theanine, responding to increasing stress levels and sleep challenges among Swiss consumers.

The company has developed an IntroDrink immune vitamins guide to help consumers navigate the complex world of immune support supplements and make informed choices based on scientific evidence. This educational resource reflects the company's commitment to empowering consumers with knowledge about natural health solutions.

The expanded vitamin and mineral selection emphasizes bioavailability and purity, with products including vitamin D3+K2 combinations, methylated B-vitamins, and ionic minerals for optimal absorption. The company sources ingredients from certified suppliers and maintains strict quality control standards throughout the production process.

Superfoods represent another growing category, with offerings including manuka honey, barley grass, moringa, and chia seeds. These nutrient-dense foods complement the supplement range and support overall wellness through whole-food nutrition.

IntroDrink operates through introdrink.ch, serving customers throughout Switzerland with fast delivery and

transparent pricing. The company distinguishes itself through its focus on premium-quality natural ingredients, emphasis on bioavailability, and commitment to education through science-based health content. All products undergo rigorous testing for purity and potency, ensuring Swiss consumers receive supplements that meet the highest quality standards.
