Crown Plumbing & Water Damage Restoration Announces Annual Disaster Relief Support Program

June 01, 2026

SAN ANTONIO, TX - June 01, 2026 -

Crown Plumbing & Water Damage Restoration has announced the launch of its annual disaster relief support program, providing comprehensive restoration and plumbing assistance to families significantly impacted by fires or major disasters in the San Antonio area. The initiative reflects the company's commitment to supporting the local community during times of crisis.

The program will provide selected families with complete restoration services, including water damage restoration, fire damage restoration, mold remediation, and essential plumbing repairs at no cost. The company will identify recipient families through partnerships with local emergency services and community organizations throughout the year.

"When disaster strikes a family, the path to recovery can seem overwhelming," said Jeremy Newman, Director of Operations at Crown Plumbing & Water Damage Restoration. "Through this program, we aim to ease that burden by providing the professional restoration and plumbing services needed to help families rebuild their homes and their lives."

The announcement comes as the company has expanded its service capabilities and geographic reach, recently adding dedicated water damage restoration services to its comprehensive offerings. The company has also established new service locations on George Road in San Antonio and in Selma, Texas, enabling faster response times for emergency situations across the region.

The disaster relief program leverages the company's unique position as both a full-service plumbing provider and restoration specialist. This dual expertise allows the company to address both immediate plumbing emergencies and the resulting structural damage under one coordinated effort, streamlining the recovery process for affected families.

The program will prioritize families facing the most severe circumstances, including those who have lost their homes to fires, experienced catastrophic flooding, or dealt with extensive storm damage. Selection criteria will consider factors such as the extent of damage, family circumstances, and available insurance coverage.

"Having both plumbing and restoration expertise means we can handle everything from the initial water line break to complete structural restoration," added Newman. "This comprehensive approach significantly reduces the time and complexity of the recovery process for families already dealing with tremendous stress."

The company's restoration services encompass water damage restoration, fire damage restoration, mold remediation and testing, asbestos removal and abatement, sewage cleanup, and home remodeling and reconstruction. Its plumbing division provides installation, repair, water heater services, inspections and maintenance, and drain and sewer services.

Crown Plumbing & Water Damage Restoration operates as a 24/7 emergency service provider throughout the San Antonio metropolitan area. The company maintains a team of certified technicians trained in the latest restoration techniques and equipped with advanced technology for water extraction, structural drying, and contamination removal. The company's integrated approach to plumbing and restoration services has established it as a comprehensive solution provider for both residential and commercial properties facing water-related emergencies and disaster recovery needs.
