

New Medical Terminology & Anatomy Course For Coders Launched By CCO

April 22, 2016

April 22, 2016 -

Medical coding training company Certification Coaching Organization, LLC, (CCO), which is based in Oceanville, NJ, is proud to announce that they have launched a brand new course. The Medical Terminology and Anatomy for Medical Coders Online Course is a full course for medical coding students who are learning medical terminology and anatomy for the first time. The course can be completed at a student's own pace.

"The Medical Terminology & Anatomy for Coders course has been designed to be perfect for people who are just starting in the field of medical coding," says Laureen Jandroep, CPC, CPC-I, COC, CMSCS, CHCI, CPPM, founder and CEO of Certification Coding Organization, LLC. "At the same time, it serves as an excellent refresher for existing coders who want to make sure their knowledge and certification remains up to date. It utilizes the ICD-10 Coding Textbook by Betsy J. Shiland and the training consists of 15 individual units."

The company has released a number of medical coding online courses to date. All of these have been designed to make sure that coders are able to access all the knowledge they require to become the best at their job. Furthermore, they enable them to not just become certified, but stay certified as well, by meeting

continuous education requirements. The new course is geared mainly towards prospective coders.

Those who have studied through Certification Coding Organization, LLC, have been very positive about their experiences. "I love CCO, their services, their instructors and their help desk is the best," says Tamika H. on the company's Facebook page. "I started following CCO and participating in their webinars through another FB group and haven't looked back. I have learned so much from CCO in the few months that I have been attending their monthly Q&A webinars and look forward to taking courses with them and attending many more webinars with them. Thank you CCO."

People are encouraged to like the Facebook page for medical coders. It gives them an opportunity to network with fellow coders and students, as well as to be kept up to date with any new courses that are released.
