

Amana Care Clinic Announces Enhanced Diagnostic Capabilities for Quad Cities Urgent Care Patients

June 02, 2026

DAVENPORT, Iowa - June 02, 2026 -

Amana Care Clinic has announced the addition of enhanced diagnostic capabilities at its Quad Cities locations, including advanced laboratory testing and digital X-ray technology, to better serve patients seeking immediate medical attention in Davenport, Bettendorf, and Muscatine, Iowa. The announcement comes as healthcare facilities across Iowa report increased patient volumes for non-emergency medical conditions requiring same-day treatment.

The Davenport health clinic has integrated new diagnostic equipment that enables comprehensive testing and treatment during single visits, reducing the need for multiple appointments or referrals to outside facilities. The additions include digital X-ray systems and expanded laboratory testing capabilities for conditions ranging from respiratory infections to minor fractures.

"Healthcare accessibility remains a critical concern for Iowa communities, particularly for patients who need immediate care but cannot wait for scheduled appointments," said Moutaz Kotob, PhD, Medical Director at

Amana Care Clinic. "These diagnostic enhancements allow our medical staff to provide more comprehensive evaluations and treatment plans during initial visits."

The clinic's diagnostic capabilities now encompass blood testing, urinalysis, strep tests, flu tests, and digital X-rays for suspected fractures and respiratory conditions. These services complement the facility's existing treatment options for lacerations, burns, sprains, infections, and other acute medical conditions that do not require emergency room intervention.

The announcement follows recent data from the Iowa Hospital Association indicating that non-emergency visits to hospital emergency departments have increased by 15 percent over the past two years. Walk-in clinics provide an alternative for patients whose conditions require prompt attention but fall outside the scope of emergency medicine, helping to reduce wait times and costs for both patients and healthcare systems.

"The integration of diagnostic technology supports more accurate initial assessments and reduces the likelihood of patients requiring follow-up visits or emergency room transfers," added Dr. Kotob. "This approach aligns with current healthcare trends emphasizing efficient, patient-centered care delivery."

Amana Care Clinic Davenport urgent care services operate on a walk-in basis, eliminating appointment requirements for patients experiencing sudden illness or injury. The facility treats conditions including upper respiratory infections, urinary tract infections, minor fractures, lacerations requiring sutures, seasonal allergies, and sports-related injuries. Pediatric and adult patients receive care from certified medical professionals trained in urgent care protocols.

The facility maintains extended hours beyond traditional physician office schedules, accommodating patients who develop symptoms outside standard business hours. Online check-in systems allow patients to register before arrival, streamlining the intake process and reducing waiting room congestion.

Amana Care Clinic operates three locations in the Quad Cities region, with facilities in Davenport, Bettendorf, and Muscatine providing identical services and diagnostic capabilities. The clinics treat a range of conditions including abrasions, back pain, ear infections, sinus infections, minor burns, childhood illnesses, and injuries to extremities. Additional services include sports physicals, wound care management, suture removal, and treatment for seasonal conditions such as sunburn and insect bites.

Established as a walk-in medical clinic serving the Quad Cities region, Amana Care Clinic provides non-emergency medical services without appointment requirements. The clinic employs certified medical professionals and maintains diagnostic equipment, including X-ray and laboratory testing facilities at each

location.
