

Javafly Launches New Brand Of Fresh Coffee Beans

April 26, 2016

April 26, 2016 - PRESSADVANTAGE -

Javafly, a Champlain, New York based company, has announced the launch of its very own exquisite brand of coffee beans. Called Faro, these refined nuggets of wonder are hand-selected for their excellence and character.

"Our new Faro range of coffee beans are of the highest quality, sourced from small brewing houses all over the world," says Mike Baron, a spokesperson for Javafly. The beans come from fair-trade organic farms in South America, Asia, Europe, and Africa, and are available exclusively on Javafly.com.

For those aficionados looking for something special, Faro's Limited Roast beans are personally culled from a single distinguished lot, providing coffee enthusiasts the chance to try something truly unique, timeless in taste but timely in vintage.

Both the classic and limited roasts, defining the coffee's strength, range from mild to medium to espresso. "We wanted to offer something that every coffee lover would appreciate," states Baron. "We've included beans that will brew the perfect cup whether you like your coffee really mild or you want it strong enough to stand on its own."

Javafly has always been known for its expertly curated selection of coffees and teas; but now with Faro it is excited to introduce "for the very first time" a coffee bean of its own brand. Baron states that everyone in the Javafly family is ecstatic, committed to layering in additional flavors, new strength varieties, and original lines of Javafly branded products in the future.

The Javafly Company cordially invites all coffee connoisseurs and their entourages to come see what's brewing by exploring the newly launched Faro brand of coffee beans at Javafly.com. All beans are packaged fresh and backed by a customer satisfaction guarantee. Whether one desires to start the morning on the right foot or to simply enjoy a jubilant cup of java anytime of day or night, Faro is the bean and Javafly.com is the place.

For thrillingly caffeinated updates, or to connect on a personal level, please visit the official Javafly Facebook page ? and, of course, don?t forget to like them.
