

Lucid Leverage Expands Private Label SEO Reseller Services to Meet Growing Agency Demand

October 15, 2026

Tempe, AZ - October 15, 2026 -

Lucid Leverage LLC, a digital marketing agency based in Tempe, Arizona, announces the expansion of its white label SEO services to address increasing demand from web design companies and video production studios seeking to offer comprehensive search engine optimization without building internal teams.

The expansion comes as digital agencies face mounting pressure to provide full-service marketing solutions while managing operational costs and technical expertise requirements. Through its wholesale SEO program, agencies can now deliver professional search optimization services under their own brand without the overhead of hiring specialized staff or developing proprietary methodologies.

The program provides complete white-label solutions, enabling partner agencies to present monthly reports featuring their own branding, logos, and contact information. This approach allows web design firms and video production companies to maintain client relationships while expanding their service offerings into the lucrative SEO market.

"Digital agencies are recognizing that SEO has become essential to their service portfolio, but building and

maintaining an in-house SEO team requires significant investment in training, tools, and ongoing education," said Chris Quintela, founder of Lucid Leverage. "Our private label SEO reseller program allows agencies to offer enterprise-level search optimization while focusing on their core competencies in design and creative services."

Recent industry data indicates that businesses allocating resources to search engine optimization see an average return on investment of 275 percent, yet many small to mid-sized agencies lack the infrastructure to deliver these services effectively. The wholesale model addresses this gap by providing technical expertise, proven methodologies, and scalable delivery systems.

The service includes comprehensive SEO strategies encompassing local search optimization, content development, link building, and technical website improvements. Partner agencies receive support throughout the sales process, including professional testimonial videos and marketing materials to introduce SEO services to their existing client base.

"We've structured our wholesale pricing to ensure agencies can maintain healthy margins while delivering competitive rates to their clients," added Quintela. "This creates a sustainable business model where everyone benefits - the agency grows revenue, the client receives professional SEO services, and we handle the technical implementation."

The expansion also addresses the specific needs of video production studios seeking to optimize their clients' video content for search engines. With video content becoming increasingly important for search visibility, production companies can now offer optimization services that ensure their creative work achieves maximum online exposure.

Lucid Leverage provides ongoing support to partner agencies, including regular strategy consultations, performance reporting, and technical troubleshooting. The company's approach combines traditional SEO techniques with social media optimization and reputation management, creating a comprehensive digital presence for end clients.

Founded in Tempe, Arizona, Lucid Leverage specializes in search engine optimization, social media management, and online reputation services. The company serves agencies nationwide through its white label partnership program, enabling web designers, marketing firms, and video production companies to expand their service offerings without additional overhead. The company maintains accreditation with the Better Business Bureau and provides comprehensive digital marketing solutions designed to increase online visibility and drive measurable business results.
