

USA Cabinet Store LLC Introduces Dedicated Designer Model for Kitchen Remodeling Projects

June 05, 2026

Cary, NC - June 05, 2026 - PRESSADVANTAGE -

USA Cabinet Store Cary, NC has implemented a dedicated regional designer model at its Cary, North Carolina showroom, providing homeowners with a single designer who manages the entire kitchen remodeling and renovation process from initial measurement through final installation. The approach, already operational at the company's Fairfax and Chantilly locations, addresses communication challenges that frequently complicate home renovation projects.

The introduction of this service model comes as Cary's housing market shows signs of stabilization. According to Zillow data from April 2026, Cary home values average approximately \$600,000, down 1.4 percent year-over-year. Redfin reports a median sale price near \$630,000, significantly higher than North Carolina's state median of \$367,600 as reported by Bankrate. This market normalization has prompted more Triangle-area homeowners to invest in renovations rather than relocate.

The timing aligns with favorable return-on-investment data for kitchen improvements. The 2025 Cost vs.

Value Report from Remodeling Magazine and Zonda indicates that a midrange minor kitchen remodel averages \$27,492 nationally and recovers approximately 96 percent of costs at resale, ranking as the top interior renovation project for value retention. North Carolina, situated in the South Atlantic region, typically matches or exceeds these national return rates.

Under the dedicated designer model, each client works with a single professional throughout their kitchen remodeling project. This designer manages all aspects including design development, product selection, permit coordination with the Town of Cary and Wake County, and installation scheduling. The streamlined approach directly addresses communication breakdowns; according to the National Association of the Remodeling Industry (NARI), consistent project management and single-point communication are critical factors in preventing delays and maintaining homeowner satisfaction during residential renovations.

"Cary and the wider Triangle have many homeowners who value their neighborhoods and prefer reinvesting in their current homes rather than relocating," said Emin Halac, CEO of USA Cabinet Store LLC. "Assigning one designer to each project from initial measurement through final installation minimizes miscommunication and streamlines the kitchen renovation process for our clients."

The Cary showroom offers multiple consultation formats including in-store, virtual, and quick-advice sessions, all provided without charge. As a permanent feature of its consultation process, the company includes complimentary VR 3D design services with no purchase obligation. USA Cabinet Store LLC maintains full licensing, bonding, and insurance credentials across its operations.

The showroom displays nine cabinet lines ranging from ready-to-assemble options to German-engineered frameless construction, including RTA Cabinets, Fabuwood, Showplace, UltraCraft, Mantra, Legacy Crafted, 1951 Cabinetry, Bertch, and Bauformat. These offerings serve homeowners throughout the Research Triangle region, including Raleigh, Durham, Chapel Hill, Apex, Morrisville, Holly Springs, and surrounding communities in Wake, Durham, Orange, and Chatham counties.

USA Cabinet Store LLC, established in 2011, operates 14 showrooms across Virginia, Maryland, North Carolina, Texas, New Jersey, Florida, and Tennessee. The company has completed thousands of kitchen and bath remodeling projects and maintains a 4.8-star average rating across more than 600 customer reviews company-wide. The organization received the 2026 NKBA Innovative Showroom Award at KBIS 2026 in the Medium-Sized Kitchen & Bath Design Center category for its Houston, Texas design center.
