

Williams and Sons Custom Construction and Design Expands Home Additions Services Throughout Missouri

July 01, 2026

CASSVILLE, MO - July 01, 2026 -
Williams and Sons Custom Construction and Design has expanded its home addition and renovation services to better serve homeowners throughout Southwest Missouri, including the Jenkins area. The family-owned construction company, which has built custom homes for over 50 years, now offers comprehensive solutions for homeowners seeking to expand and enhance their existing properties rather than relocate.

The expansion represents a strategic shift for the Cassville-based company, which previously focused primarily on custom home construction and new builds. The enhanced service offerings include room additions, second-story expansions, kitchen and bathroom extensions, and separate structures such as garages and pool houses. The company manages every aspect of these projects, from initial design and permit acquisition through construction and final finishes.

"After five decades of building custom homes, we recognized that many families want to stay in their current

homes but need additional space or updated layouts to accommodate their changing lifestyles," said Trevor, a company representative for Williams and Sons Home Additions. "This expansion allows us to bring the same quality craftsmanship and attention to detail we're known for in custom home building to renovation and addition projects."

The decision to expand services comes as housing inventory remains limited across Missouri, and many homeowners face rising interest rates that make moving less attractive. By offering comprehensive home addition services, the company provides an alternative that allows families to customize their existing spaces without the disruption and expense of purchasing a new property.

Williams and Sons Trusted Contractor maintains its commitment to a hands-on approach throughout every project phase. The company's in-house design services work directly with clients to ensure additions seamlessly integrate with existing structures while meeting specific family needs. Project management includes maintaining clean job sites, adhering to established timelines, and providing clear communication at every step of the construction process.

The expanded services are available across the company's existing service area, which includes Monett, Golden, Eagle Rock, Shell Knob, Cassville, and surrounding communities. Each project begins with a free consultation where homeowners can discuss their vision, receive professional recommendations, and obtain detailed estimates.

The company's approach differs from many contractors by maintaining owner involvement on every job site. This hands-on management style ensures quality control and allows for immediate resolution of any concerns that arise during construction. The same attention to detail that has defined their custom home building for half a century now extends to every addition and renovation project.

Williams and Sons Custom Construction and Design has established itself as a cornerstone of the Southwest Missouri construction industry through its family-operated business model and commitment to quality craftsmanship. The company specializes in custom homes, new construction, and now expanded home addition services, bringing decades of experience to every project while maintaining the personal touch that comes from local, family ownership.
