

Fourth Creek Family Dentistry Expands Same-Day Dental Services in Statesville

June 08, 2026

STATESVILLE, NC - June 08, 2026 - PRESSADVANTAGE -

Fourth Creek Family Dentistry has expanded its same-day treatment capabilities to address the growing demand for immediate dental care in the Statesville area. The practice, led by Dr. Clay Powelson who has been practicing dentistry since 2005, now offers enhanced scheduling flexibility for patients experiencing dental emergencies or requiring urgent care.

The expanded same-day services encompass emergency treatments for toothaches, broken teeth, cracked teeth, and pain caused by decay or infection. Additionally, the practice has streamlined its appointment system to accommodate patients who need immediate consultations for restorative procedures, including single tooth implants, partials, dentures, and snap-on dentures.

"Dental emergencies rarely happen at convenient times, and patients experiencing pain or dental trauma need immediate attention," said Dr. Clay Powelson, lead dentist at Fourth Creek Family Dentistry. "By expanding our same-day capabilities, we can provide timely relief while maintaining the comprehensive care standards our patients expect."

The practice's same-day treatment initiative complements its full range of general and restorative dentistry services. Regular cleanings and exams remain a cornerstone of the practice's preventive care approach, while advanced restorative treatments help patients maintain optimal oral health and function. Professional teeth whitening services are also available for patients seeking aesthetic improvements.

Recognizing that dental care accessibility extends beyond scheduling, Fourth Creek Family Dentistry has implemented multiple payment solutions. The practice accepts most dental insurance plans and provides assistance to help patients understand their coverage and maximize benefits. For those without insurance, a Dental Savings Plan offers significant discounts on services. The practice also accepts CareCredit and Cherry financing options, allowing patients to distribute treatment costs over manageable monthly payments.

"Making quality dental care accessible means addressing both timing and financial considerations," noted Dr. Powelson. "Our combination of same-day availability and flexible payment options ensures that patients can receive necessary treatment without unnecessary delays or financial stress."

The practice has also introduced special offerings for new patients, including complimentary implant consultations and smile makeover assessments, along with discounted rates for comprehensive exams, X-rays, and professional cleanings.

As a Dentist in Statesville, Fourth Creek Family Dentistry serves the local community with a patient-centered approach that emphasizes both immediate care needs and long-term oral health. The practice's commitment to same-day treatment availability reflects broader trends in healthcare toward increased accessibility and patient convenience.

Fourth Creek Family Dentistry continues to serve the Statesville community with comprehensive dental services ranging from preventive care to complex restorative procedures. The practice maintains its focus on ensuring patients' teeth remain healthy, function properly, and maintain their aesthetic appeal through personalized treatment plans and modern dental techniques.
