

Artisan Design Remodel Launches Free Kitchen Remodel Cost Estimator for Phoenix Homeowners

June 16, 2026

PHOENIX, AZ - June 16, 2026 - PRESSADVANTAGE -

Artisan Design Remodel, a woman-owned kitchen remodeling company led by a female licensed general contractor, has launched a free online kitchen remodeling calculator to help Phoenix-area homeowners understand realistic project costs before beginning contractor consultations.

The new tool addresses a persistent challenge in the home improvement industry where homeowners routinely enter contractor meetings without understanding what their kitchen renovation realistically costs. This knowledge gap creates friction during consultations, leads to misaligned expectations between homeowners and contractors, and often results in budget surprises that derail projects before construction begins. Industry data shows that most homeowners underestimate kitchen remodeling costs by 30 to 50 percent, leading to scaled-back projects or abandoned plans when actual pricing emerges during the planning phase.

The kitchen remodeling calculator walks users through the primary cost variables that impact Phoenix-area

kitchen remodel pricing. These factors include layout modifications, cabinetry selection, countertop materials, appliance upgrades, flooring choices, lighting design, and the scope of plumbing and electrical work required. By answering straightforward questions about their project goals and preferences, homeowners receive a realistic price range specific to the Phoenix market in approximately two to three minutes. The tool accounts for local labor costs, material availability, and regional construction requirements that affect pricing in the Phoenix metropolitan area.

"When homeowners understand the real investment required for their kitchen remodel before they start calling contractors, they make better decisions about scope, materials, and timing," said Audrey Thacker, owner of Artisan Design Remodel. "This knowledge empowers them to have productive conversations with contractors from the very first meeting, rather than experiencing sticker shock weeks into the planning process."

The estimator represents a shift toward transparency in an industry where pricing information has traditionally remained opaque until formal proposals are presented. By providing realistic cost ranges upfront, the tool helps homeowners align their vision with their budget before investing time in consultations or design work. This approach reduces wasted time for both homeowners and contractors while helping families make informed decisions about one of the largest investments they will make in their homes.

Artisan Remodel Design stands out in the residential remodeling industry as a woman-owned business led by a female licensed general contractor, a distinction that remains uncommon in the construction trades. This perspective brings a different approach to project management and client communication in an industry where women hold fewer than three percent of general contractor licenses nationally.

The cost estimator launch comes as Phoenix-area homeowners increasingly seek kitchen updates to accommodate changing lifestyle needs. With home values rising and interest rates fluctuating, understanding renovation costs has become essential for homeowners deciding between remodeling and relocating.

Artisan Design Remodel is a woman-owned kitchen remodeling company serving Phoenix, Scottsdale, Paradise Valley, Arcadia, Cave Creek, Fountain Hills, and surrounding communities.
