Prop Depot Expands Aluminum and Stainless Props Inventory to Meet Growing Boating Demand

June 19, 2026

KNOXVILLE, TN - June 19, 2026 -
Prop Depot, a division of Tennessee Propeller & Metalworks, has significantly expanded its inventory of marine propellers to address increasing demand from boat owners nationwide seeking quality replacement and upgrade options for the 2024 boating season.

The expansion includes a comprehensive selection of both aluminum and stainless steel propellers from leading manufacturers, including ACME, Mercury, OJ Propellers, PowerTech, Solas, and Volvo Penta. The enhanced inventory positions the company to serve the diverse needs of recreational boaters, commercial operators, and marine service centers across the United States.

Aluminum Props at Prop Depot now include options for outboard motors, sterndrive engines, and various specialized applications. The company maintains one of the largest ready-to-ship inventories in the industry, reducing wait times for customers who need immediate replacements or upgrades.

"The marine industry has seen remarkable growth in recent years, and boat owners are increasingly looking for reliable sources for both new propellers and professional repair services," said a Prop Depot

spokesperson. "Our expanded inventory ensures we can provide the right propeller solution for virtually any boat, engine, and application, whether customers need aluminum props for everyday use or high-performance stainless steel options."

The company's commitment extends beyond sales to include comprehensive repair services with a guaranteed 3-5 day turnaround for wake/surf boat and stainless propeller repairs. All repairs restore propellers to original equipment manufacturer specifications using precision tools and instruments.

To help customers Find the Best Aluminum and Stainless Props for their specific needs, Prop Depot offers a proprietary Prop Finder tool that matches boat specifications with optimal propeller choices. The service considers factors including boat type, engine specifications, and intended use to recommend suitable options from the extensive inventory.

"We understand that selecting the right propeller can be complex, which is why our knowledgeable representatives are available to provide personalized consultation," added the spokesperson. "Whether someone needs a standard aluminum replacement or a specialized stainless prop for performance applications, we work directly with each customer to identify the optimal solution."

The expanded inventory includes specialized options such as POD drive propellers, cruiser propellers, and demo units for budget-conscious buyers. Marine accessories and prop pullers are also available to support complete propeller maintenance and replacement needs.

Customer satisfaction remains central to the company's operations. Boat owners can Check Our Ratings and Reviews to see feedback from customers nationwide who have relied on Prop Depot for both new propeller purchases and repair services. The company offers free shipping on orders exceeding $249.99 and covers UPS shipping both ways for customer convenience.

Prop Depot operates as an authorized dealer for all major propeller brands and maintains competitive pricing. The company serves customers throughout the United States from its Tennessee facility, providing both retail and wholesale services to marine dealers and service centers.
