

ProCycles.ch Launches Comprehensive Swiss E-Bike and Bicycle Shop Directory

June 25, 2026

Zurich, Zurich - June 25, 2026 -
ProCycles.ch, the Winterthur-based online platform, has launched a comprehensive directory connecting Swiss cyclists and e-bike riders with verified local dealers, workshops, and repair services across all cantons. The specialized platform addresses the growing demand for accessible information about bicycle retailers and service providers throughout Switzerland.

The directory arrives as Switzerland experiences unprecedented growth in e-bike adoption, with sales increasing substantially year over year. ProCycles.ch provides cyclists with location-based search capabilities, allowing users to quickly identify nearby shops offering sales, repairs, rentals, and specialized services. Each listing undergoes verification to ensure current information about available brands, services, and contact details.

The company notes that the rapid expansion of e-bike usage in Switzerland has created a clear need for a centralized resource that connects riders with qualified local service providers. They built the platform to

bridge the gap between cyclists seeking reliable support and the independent bike shops that form the backbone of Swiss cycling infrastructure.

The platform distinguishes itself through its exclusive focus on the Swiss market, incorporating regional preferences and the specific needs of Swiss cyclists. With the e-bike segment experiencing particularly strong growth, ProCycles.ch news indicates the directory emphasizes shops with e-bike expertise, helping riders locate specialists familiar with electric bicycle technology, maintenance requirements, and safety standards.

Local bicycle retailers benefit from enhanced online visibility through the directory, which helps independent shops compete in an increasingly digital marketplace. The platform supports sustainable mobility initiatives by strengthening connections between communities and their local cycling businesses, encouraging residents to shop locally for their cycling needs.

Swiss cities have witnessed rising cycling popularity, with more residents choosing bicycles and e-bikes for daily transportation. This trend has increased demand for quality local support, from routine maintenance to specialized repairs. Finding a reliable Fahrrad Werkstatt Schweiz has become essential for cyclists who depend on their bikes for commuting, recreation, or cargo transportation.

The directory addresses various cycling needs, from families searching for cargo bikes to commuters requiring regular maintenance services. Users can filter results based on specific requirements, whether seeking rental options for tourists, specialized mountain bike services, or shops carrying particular brands.

ProCycles.ch operates from Winterthur and serves cyclists throughout Switzerland. The platform maintains a user-friendly interface designed for quick navigation and efficient information retrieval. By focusing exclusively on the Swiss market, the directory provides tailored solutions that reflect local cycling culture and infrastructure.

The launch of ProCycles.ch represents a significant development in Swiss cycling infrastructure, providing a centralized resource that benefits both cyclists and local businesses. As e-bike adoption continues to accelerate and cycling becomes increasingly integral to Swiss transportation, the platform positions itself as an essential tool for connecting riders with the services they need.

ProCycles.ch is a leading online directory for bicycle and e-bike shops in Switzerland. Based in Winterthur, the platform helps cyclists discover verified dealers, workshops, and brands through a fast, clear, and locally organized system designed specifically for the Swiss market.
