

Trinity Fencing Company Marks Five Years Serving Ascension Parish Homeowners

June 26, 2026

June 26, 2026 - PRESSADVANTAGE -

Trinity Fencing Company, an owner-operated residential fence contractor based in Prairieville, today announced the company has reached its five-year mark and completed more than 700 residential fence installations across Ascension Parish and surrounding South Louisiana communities. The company holds a 4.9-star rating across 135 Google reviews and was named a Nextdoor Neighborhood Fave in both 2024 and 2025.

Founded in February 2022 by owner Jack "Trey" Hardesty, Trinity Fencing operates as a residential-only contractor under Louisiana Contractor License No. 565280. The company serves homeowners across Prairieville, Gonzales, Denham Springs, Zachary, St. Gabriel, and the greater Baton Rouge metro area. Hardesty is on-site for every project, and the company commits to returning customer inquiries within two hours.

A core part of the Trinity approach involves how the fence meets the ground. The company installs galvanized steel posts on every project rather than wood posts, using the PostMaster+ system, which carries a Limited Lifetime Warranty from the manufacturer. Posts are set three to four feet deep to reach the clay

layer beneath South Louisiana topsoil, with a four-foot minimum in drainage-prone areas. The method is designed to address the wood post failure common in the region's wet, humid climate. Trinity backs metal-post installations with a lifetime workmanship warranty when paired with a metal frame, and a one-year workmanship warranty on wood-post builds.

Trinity offers cedar wood privacy fencing, aluminum ornamental fencing in flat top, spear top, and curved top styles, vinyl privacy and semi-privacy options, and galvanized and vinyl-coated chain link. Gate installation and fence repair are also part of the company's residential service mix. For wood projects, the company recommends cedar over pine for longevity in the South Louisiana climate, and offers stock cap and fascia upgrades for homeowners focused on curb appeal. Trinity handles 811 utility locates before every dig and assists customers with permit paperwork in jurisdictions that require it, including parts of Gonzales.

The company structures payment around a 15 percent deposit at signing, with the remaining balance due the day of installation. Financing is available through Wisetack for qualified homeowners. Trinity also operates an online estimator tool that allows homeowners to build a project estimate before scheduling an in-person measurement.

"I started this company after a contractor showed up late at my own house, left a mess, and made me feel like an afterthought," said Jack Hardesty, owner of Trinity Fencing Company. "I figured I could beat half the competition just by doing the basics ? showing up when we say we will, calling people back, cleaning up the jobsite. Five years and 700 fences in, that hasn't changed. We are in the customer service business. We just happen to build really good fences."

Homeowners interested in Trinity Fencing's work across Ascension Parish can view the company's profile for project photos and customer reviews, or visit the company website to begin an estimate.
