

Sunstar Construction Strengthens Regional Presence as Tri-State Licensed General Contractor

June 23, 2026

ST. GEORGE, UT - June 23, 2026 -
Sunstar Construction, a St. George-based general contractor with over 15 years of industry experience, continues to expand its comprehensive construction services across Southern Utah, Southern Nevada, and Northern Arizona. The company maintains full licensing in all three states, positioning itself as a regional resource for both commercial and residential construction projects.

The company provides general contracting, remodeling, tenant improvements, additions, restoration, and construction project support to a diverse client base including property owners, tenants, brokers, property managers, and homeowners. With operations centered at its St. George facility, Sunstar Construction has developed a reputation for transparent bidding practices and hands-on project management across the tri-state region.

"Clear communication and dependable project management form the foundation of every project we undertake," said Kevin Tatom, Owner at Sunstar Construction. "Property owners throughout our service area

rely on us not just for quality construction, but for the peace of mind that comes from working with a contractor who maintains consistent communication from initial consultation through project completion."

The company's service portfolio encompasses medical facilities, hospitality projects, commercial buildings, multifamily housing, retail spaces, restaurants, and high-end residential remodels. Recent operational enhancements include the establishment of an in-house bathroom cabinet shop, which has improved both timeline efficiency and quality control for bathroom renovation projects.

Sunstar Construction specializes in managing construction projects in occupied spaces, a critical capability for businesses and property managers who need to maintain operations during renovations. The company's approach includes detailed planning around existing tenants, careful scheduling to minimize disruptions, and responsive project management when timelines are compressed.

"We understand that construction projects represent significant investments for property owners, whether they're updating a commercial space or renovating their home," added Tatom. "Our team focuses on practical problem-solving and maintains owner attention on every jobsite to ensure projects stay on schedule and within budget."

The company offers free consultations to prospective clients and maintains a fully staffed team supported by established trade partners throughout the region. This network enables Sunstar Construction to handle projects ranging from kitchen and bathroom remodels to complete commercial build-outs and new construction projects.

For property owners and managers seeking additional information about construction planning and project management, resources are available at https://sunstarconstruction.com/about, where the company shares construction insights and project planning articles.

Sunstar Construction operates from its headquarters in St. George, Utah, serving as a regional hub for construction services throughout Southern Utah, Southern Nevada, and Northern Arizona. The company combines local ownership and operation with extensive industry experience, offering design-build services, flooring installation, office renovations, and comprehensive restoration work. With its tri-state licensing and commitment to relationship-focused construction services, the company continues to serve as a trusted partner for property development and improvement projects across the Southwest.
