

Adams Pool Solutions Expands Commercial Pool Renovation Services for Bay Area Institutions

August 13, 2026

PLEASANTON, CA - August 13, 2026 -

Adams Pool Solutions, a Northern California swimming pool contractor, has expanded its commercial pool renovation capabilities to meet growing demand from hotels, educational institutions, and homeowners associations throughout the San Francisco Bay Area. The Pleasanton-based company brings seven decades of experience and specialized expertise to large-scale aquatic facility projects requiring strict compliance standards and minimal operational disruption.

The expansion addresses increasing renovation needs across the region as commercial pool facilities face aging infrastructure, evolving safety regulations, and heightened durability requirements. With approximately 1,200 projects completed annually and a workforce of 340 employees, the company has positioned itself to handle the unique challenges of commercial pool renovation that differ significantly from residential projects.

Commercial pool renovation presents distinct requirements compared to residential work, including adherence to Americans with Disabilities Act guidelines, health department regulations, and commercial-grade material specifications. These projects typically involve larger water volumes, heavier bather loads, and more complex filtration systems that demand specialized knowledge and experience. Additionally, commercial facilities often require work to be completed during limited timeframes to minimize business interruption or facility downtime.

"Commercial pool renovation requires a fundamentally different approach than residential projects," said Adams Pool Solutions General Manager Kris Viscovich. "Properties need contractors who understand compliance requirements, can manage large-scale logistics, and deliver durable solutions that withstand intensive daily use. Our decades of experience with hotels, municipalities, and educational institutions have prepared us to meet these complex demands while maintaining tight project schedules."

Adams Pool Solutions provides commercial pool renovation for properties and institutions across the San

San Francisco Bay Area. The company's commercial division specializes in resurfacing, replastering, and comprehensive renovations for aquatic facilities ranging from hotel pools to municipal aquatic centers. Their expertise extends to updating aging equipment, improving energy efficiency, and ensuring all work meets current safety and accessibility standards.

The value of experienced commercial pool contractors becomes evident in project planning and execution. Large-scale renovations require coordination with multiple stakeholders, management of specialized equipment, and adherence to strict timelines that align with facility operations. Experienced contractors can anticipate potential challenges, navigate regulatory requirements efficiently, and implement solutions that extend facility lifespan while reducing long-term maintenance costs.

For homeowners associations and property management companies, selecting contractors with proven commercial experience can mean the difference between a smooth renovation and costly delays. Commercial-grade materials and construction methods, while initially more expensive, typically provide superior longevity and reduced maintenance requirements compared to residential-grade alternatives.

Adams Pool Solutions commercial pool renovation services encompass complete facility assessments, regulatory compliance reviews, and customized renovation plans tailored to each property's specific needs and budget constraints. The company's in-house construction crews and project coordinators manage all aspects of commercial pool renovation from initial planning through final inspection.

Established in 1953 as a family-operated business, Adams Pool Solutions has grown to become one of the most prolific pool remodeling firms in the United States. The company serves the San Francisco Bay Area, Central Valley, and Monterey Peninsula, specializing in commercial pool construction and both commercial and residential pool renovation services.
