

Dinardo Tree Care Expands Professional Arborist and Tree Trimming Service Throughout Dallas Metro Area

June 23, 2026

Dallas, TX - June 23, 2026 -
Dinardo Tree Care, a certified tree care company serving the Greater Dallas area, announces the expansion of its comprehensive arborist services to meet growing demand for professional tree maintenance across Highland Park, Preston Hollow, Lake Highlands, Lakewood, Coppell, and Highland Village.

The expansion comes as property owners increasingly recognize the importance of regular tree maintenance for both safety and property value. The company's certified arborists provide specialized services including tree pruning, fertilization, air spading, tree healthcare and diagnosis, insect and disease control, water management, deep root fertilization, tree and stump removal, and storm damage recovery.

"Every tree requires individualized care based on its species, age, and environmental conditions," said Jared Dinardo, ISA Certified Arborist at Dinardo Tree Care. "Our expansion allows us to bring professional tree trimming highland park residents have come to trust, along with our full range of services, to more communities throughout the Dallas metro area."

The company follows the ANSI A300 Tree Care Standards, which are approved by the American National Standards Institute and serve as the final authority in the US Civil Court system. This compliance ensures that all work aligns with the highest industry benchmarks for tree care and maintenance.

Tree pruning remains one of the most requested services, as proper pruning techniques are essential for maintaining tree health and preventing potential hazards. Incorrect pruning can lead to structural weakness, disease susceptibility, and shortened tree lifespan. The company's arborists develop customized pruning plans for each tree, considering factors such as growth patterns, structural integrity, and aesthetic goals.

Beyond routine maintenance, the expanded service area allows more property owners to access specialized treatments including deep root fertilization and air spading. Air spading, a technique that loosens compacted soil around tree roots, improves water and nutrient absorption while promoting healthier root development. This service has become increasingly important in urban and suburban environments where soil compaction from construction and foot traffic can severely impact tree health.

The company also addresses urgent tree care needs through its storm damage recovery services. Following severe weather events, certified arborists assess damage, remove hazardous branches, and implement stabilization measures to help trees recover from storm-related trauma.

For commercial and residential clients seeking comprehensive tree service highland park and surrounding areas, the expansion ensures access to all-natural tree care methods that promote long-term tree health and wellness. The company's approach emphasizes organic treatments and proven techniques that support sustainable urban forest management.

Dinardo Tree Care specializes in maintaining the overall health and wellness of trees through organic treatments, proven techniques, and certified training. The company serves both commercial and residential clients throughout the Greater Dallas area, offering comprehensive tree care services that range from routine maintenance to emergency storm damage recovery. All services are performed by ISA Certified Arborists who adhere to industry-leading standards for tree care and safety.
