

daylight AG Unveils Advanced Course Management Software Features for Swiss Schools

August 17, 2026

Winterthur, ZH - August 17, 2026 -
daylight AG - Schulverwaltungs-, Kursverwaltungs-, Prüfungsverwaltungs-, Event- & Rechnungswesen Software, the Winterthur-based educational technology company, unveils new features within its integrated software platform that address evolving administrative requirements for schools and educational organizations throughout Switzerland.

The software update introduces expanded functionality for course scheduling, automated examination processing, and enhanced financial reporting capabilities. These additions respond to feedback from educational institutions requiring more sophisticated tools for managing increasing enrollment volumes and complex administrative workflows across multiple departments.

The platform now incorporates advanced data synchronization capabilities that enable real-time updates across all administrative modules. Educational institutions can process student registrations, coordinate examination schedules, manage event logistics, and handle financial transactions through a single integrated

interface. The system's architecture supports both cloud-based deployment and on-premises installation, accommodating varying IT infrastructure requirements across different educational organizations. The company provides comprehensive information about the platform's capabilities at https://daylight-ag.localo.site/ for educational institutions evaluating digital transformation options.

Swiss schools implementing the updated platform gain access to automated workflow tools that reduce manual data entry requirements by approximately 40 percent, according to initial deployment metrics. The software's modular design allows institutions to activate specific functionalities based on operational needs, from basic course registration to comprehensive financial management systems.

The latest features include enhanced API connectivity for integration with third-party educational tools, expanded reporting capabilities for compliance documentation, and improved user interface elements designed specifically for administrative staff in educational settings. These technical improvements align with current Swiss educational technology standards and regulatory requirements for data management in academic institutions.

Educational organizations ranging from vocational training centers to academic institutions currently utilize the platform for daily administrative operations. The software processes thousands of course registrations, examination schedules, and financial transactions monthly across its user base, demonstrating its capacity to handle diverse institutional requirements.

Organizations seeking updates on product developments and industry insights can access resources at https://pressadvantage.com/organization/daylight-ag/ to stay informed about educational technology trends.

daylight AG has operated in the Swiss educational technology sector for over two decades, developing specialized software solutions from its headquarters at Bahnhofplatz 12 in Winterthur. The company's location at https://maps.app.goo.gl/FYDvnuHbdtTgjGRaA serves as the development center where technical teams continue advancing the platform's capabilities based on evolving educational sector requirements.

The company focuses on creating software solutions that address administrative challenges specific to Swiss educational institutions. Through systematic automation and process optimization, daylight AG provides schools, training centers, and educational organizations with digital tools that transform administrative operations while maintaining compliance with Swiss educational standards and data protection regulations.
