Cestari Introduces Versatile Shaker for Summer Homemade Salad Dressing and Marinade Preparation

June 25, 2026

LITTLETON, MA - June 25, 2026 -
Cestari, a kitchen tools manufacturer known for its lifetime-guaranteed products, announces the availability of its multi-purpose shaker designed to streamline summer meal preparation by combining the functions of mixing bowls and whisks into a single tool for creating vinaigrettes, marinades, and brines.

The shaker addresses the seasonal increase in outdoor dining and grilling by enabling home cooks to quickly prepare fresh dressings and marinades without multiple utensils or containers. The tool's design allows users to add ingredients directly into the shaker, combine them through shaking, and pour the finished mixture, eliminating the need for separate mixing bowls and whisks during peak summer cooking season.

The consolidation of homemade dressing and marinade tools into one vessel reflects broader trends in kitchen organization, where multi-functional items replace single-purpose gadgets. The shaker's capacity to handle both oil-based vinaigrettes and water-based brines makes it particularly suited for summer cooking, when outdoor entertaining often requires quick preparation of multiple condiments and marinades.

"Summer cooking should be about enjoying fresh flavors, not cluttering the kitchen with multiple tools," said

Susan MacDowell, founder of Cestari. "This shaker handles everything from a classic balsamic vinaigrette for garden salads to citrus-herb marinades for grilled chicken, all while taking up minimal counter space."

Cestari kitchen tools on Amazon have expanded to include this versatile shaker alongside the company's existing catalog of cooking implements. The introduction coincides with increased consumer interest in homemade alternatives to store-bought dressings and marinades, driven by preferences for controlling ingredients and reducing preservatives.

The timing aligns with the peak growing season when home gardens produce abundant fresh vegetables and herbs. The shaker accommodates various summer flavor combinations, including honey-mustard vinaigrettes for mixed greens, Mediterranean herb blends with oregano and basil for tomato salads, and Asian-inspired sesame-ginger dressings for cucumber salads. For grilling enthusiasts, the same tool creates marinades such as garlic-rosemary blends for lamb, teriyaki-style mixtures for vegetables, and simple salt-water brines for poultry.

Beyond product offerings, Cestari maintains engagement with home cooks through its weekly recipe newsletter, which provides seasonal recipes, kitchen techniques, and cooking tips to many subscribers. The newsletter frequently features applications for the company's tools, including summer-specific uses for the shaker.

Cestari specializes in kitchen tools backed by lifetime guarantees, reflecting the company's commitment to durability and functionality. The company's product line encompasses categories from basic cooking utensils to specialized food preparation tools, all designed to simplify home cooking while maintaining professional-grade results. Through its combination of quality tools and educational resources, Cestari supports home cooks in creating memorable meals for family and friends.
