

Amana Care Clinic Announces Enhanced Urgent Care Capabilities for Davenport Area

June 23, 2026

DAVENPORT, Iowa - June 23, 2026 -
Amana Care Clinic has announced enhanced diagnostic and treatment capabilities at its walk-in medical facilities serving Davenport, Bettendorf, and Muscatine, Iowa. The announcement comes as healthcare facilities across the Quad Cities region report increased patient volumes during the current respiratory illness season.

The urgent care clinic has added extended service hours and upgraded diagnostic equipment at its locations to address rising demand for non-emergency medical treatment. These enhancements include digital X-ray technology upgrades and expanded laboratory testing capabilities that enable same-day results for common diagnostic procedures.

"We have implemented operational changes to reduce patient wait times while maintaining comprehensive care standards," said Moutaz Kotob, PhD, Medical Director at Amana Care Clinic. "The addition of enhanced diagnostic capabilities allows our medical staff to provide more efficient evaluation and treatment of acute

conditions."

The clinic's facilities now process an average of 200 patients daily across all locations, representing a 35 percent increase from the previous year. Common conditions treated include respiratory infections, minor lacerations, fractures, and seasonal allergies. The facility maintains procedure rooms equipped for minor surgical interventions, wound care, and orthopedic injury assessment.

Amana Care Clinic Quad Cities walk-in medical care operates without appointment requirements, differentiating it from traditional primary care practices. Patients presenting with non-life-threatening conditions can receive immediate evaluation and treatment during extended operating hours, including evenings and weekends. The clinic accepts most major insurance plans and provides transparent pricing for self-pay patients.

Data from the Iowa Hospital Association indicates that urgent care facilities statewide treated approximately 1.2 million patients in 2023, diverting an estimated 60 percent of these cases from hospital emergency departments. This trend reflects changing patient preferences for accessible healthcare options and the growing role of urgent care in the healthcare delivery system.

The clinic's medical staff includes board-certified physicians, nurse practitioners, and physician assistants trained in emergency and family medicine. Each location maintains on-site laboratory services capable of performing complete blood counts, urinalysis, strep testing, and influenza diagnostics. Radiological services include digital X-ray imaging for evaluation of fractures, pneumonia, and other conditions requiring immediate diagnostic imaging.

"The integration of comprehensive diagnostic services with immediate care delivery addresses a critical gap in healthcare accessibility," added Dr. Kotob. "Patients experiencing acute symptoms can receive diagnosis and treatment in a single visit, eliminating delays associated with referrals and multiple appointments."

Recent regulatory changes in Iowa have expanded the scope of services that urgent care facilities can provide, including administration of certain medications previously restricted to emergency departments. These changes enable facilities like Amana Care Clinic to treat a broader range of conditions while maintaining appropriate medical oversight and safety protocols.

Amana Care Clinic operates as a multi-location urgent care provider serving the Quad Cities region of Iowa. The clinic specializes in treating non-emergency medical conditions through walk-in service delivery, maintaining fully equipped medical facilities with diagnostic laboratories and imaging capabilities. The

organization employs certified healthcare professionals and serves residential and commercial communities throughout eastern Iowa.
