

Amana Care Clinic Expands Diagnostic Services at Muscatine Facility

June 24, 2026

MUSCATINE, Iowa - June 24, 2026 -
Amana Care Clinic - Muscatine has expanded its diagnostic capabilities with additional laboratory testing and X-ray services at its eastern Iowa facility, addressing increased demand for same-day medical evaluations in the region. The expansion follows data from the Iowa Hospital Association indicating a 23 percent rise in urgent care visits statewide over the past five years.

The facility now provides comprehensive diagnostic testing for conditions ranging from respiratory infections to minor fractures, enabling medical staff to complete evaluations and treatment during a single visit. The service expansion positions the Muscatine location alongside the clinic's Davenport facility in offering full-service walk-in medical care throughout the Quad Cities region.

"The addition of expanded diagnostic capabilities allows our medical team to provide complete evaluations without referring patients to multiple facilities," said Dr. Moutaz Kotob, Medical Director at Amana Care Clinic. "This development particularly benefits patients who need diagnostic confirmation for conditions that fall

between primary care and emergency department severity."

The urgent care clinic treats non-emergency conditions, including respiratory infections, minor fractures, lacerations requiring sutures, sports injuries, and childhood illnesses. Laboratory services now include testing for urinary tract infections, strep throat, influenza, and other common conditions. X-ray equipment supports the evaluation of potential fractures, joint injuries, and respiratory conditions.

Data from the American Academy of Urgent Care Medicine shows that urgent care facilities nationwide have increased their diagnostic capabilities by 40 percent since 2019. This expansion reflects shifting patient preferences for immediate medical attention outside traditional office hours and without emergency department wait times.

Amana Care Clinic Muscatine walk-in medical care services encompass treatment for abrasions, burns, ear infections, sinus infections, and muscle injuries. The facility provides sports physicals required for student athletic participation and manages acute episodes of chronic conditions. Medical protocols align with urgent care industry standards for non-emergency condition management.

The medical team includes board-certified physicians, nurse practitioners, and physician assistants with specialized training in urgent care medicine. Staff maintain current certifications in emergency procedures and participate in continuing education programs specific to urgent care protocols.

The Muscatine facility serves eastern Iowa communities as part of Amana Care Clinic's regional network. The organization's locations provide medical services for non-critical conditions that require prompt attention but do not warrant emergency department resources.

The walk in clinic operates with both online check-in and traditional walk-in options. Patients can reserve their place in line through the digital system or arrive directly at the facility. Extended operating hours accommodate patients unable to visit during standard business hours.

Amana Care Clinic operates walk-in medical facilities in Muscatine and Davenport, Iowa, serving the Quad Cities region with non-emergency healthcare services. The clinics provide treatment for minor injuries and illnesses, diagnostic testing through laboratory and X-ray services, and preventive care including sports physicals. The facilities offer online check-in and walk-in options for patients seeking medical care without appointments.
