

## **Premier Deck, a Rochester, NH Deck-Building Specialist, Brings Two Decades of Expertise to Custom Decks Across the New Hampshire Seacoast and Southern Maine**

*June 24, 2026*

ROCHESTER, NH - June 24, 2026 - PRESSADVANTAGE -

Premier Deck, a family-owned custom deck builder specializing in decks and the outdoor living spaces they create, serves residential and commercial clients across the New Hampshire Seacoast and southern Maine. A Top Rated Local® deck builder operating from a single location at 7 Spaulding Ave, Rochester, NH 03868, the company holds TimberTech Platinum installer status and designs and builds custom composite and PVC decks, pool decks, pergolas, railings, and a range of outdoor living additions for homeowners, landlords, and businesses throughout the region.

Premier Deck was founded in 2018 by owner Steve Kirk, who brings more than 22 years of construction experience in framing, project management, and design to the company's custom deck work. Kirk guides every deck from the initial consultation through the final walk-through and warranty issuance. The company is family-owned, with Kirk's daughter April involved in client communication and project coordination alongside the broader project team.

"Every deck we build is designed around how a family or business actually wants to use the space, and built to last through New Hampshire's seasons," said Steve Kirk, owner of Premier Deck. "We stay focused on decks and outdoor living so our clients get a specialist, not a generalist."

Premier Deck builds residential and commercial decks in composite and PVC, with a strong preference for composite systems that reduce long-term maintenance. As a TimberTech Platinum contractor, one of the highest credential levels available through the TimberTech program, the company installs TimberTech Advanced PVC systems alongside AZEK composite decking products, with Trex railing options available. These materials are selected to stand up to the region's freeze-thaw cycles, moisture, and seasonal swings while keeping ongoing maintenance low.

Pool deck construction is a core service offering, and the company has completed pool deck projects across its service area in both New Hampshire and Maine. For clients addressing structural foundation requirements, Premier Deck also installs helical pile foundation systems, which anchor below the frost line to resist seasonal frost heave, providing a durable alternative to conventional concrete footings in certain site conditions.

Beyond new construction, Premier Deck handles deck remodels and repairs, re-railing installations, pergola construction, deck lattice, deck lighting, and under-deck drainage systems designed to create a dry, usable area beneath elevated decks. The company also builds custom condo decks and commercial deck structures for businesses including restaurants, breweries, golf courses, and other outdoor gathering venues.

Every project follows a structured five-step process covering design, framing, decking, railing, and add-on options, with detailed proposals and two to three design options presented before any contract is signed. A digital project portal provides clients with daily updates and site photos throughout the build. Financing is available through partnerships with Home Loan Investment Bank and Upgrade, offering multiple loan options for projects across a range of budgets.

Premier Deck backs every project with a five-year craftsmanship warranty and a 30-year product warranty on materials installed. The company also provides a complimentary Deck Check inspection after the first year of ownership, covering decking, railing, footings, framing, flashing, and metal connectors at no cost to the client.

Premier Deck holds active membership in the North American Deck and Railing Association (NADRA) and carries TimberTech Platinum contractor status, reflecting both manufacturer-level training and recognized industry standards in deck building and safety.

Premier Deck serves clients across the New Hampshire Seacoast region and southern Maine. Service area communities in New Hampshire include Rochester, Dover, Somersworth, Barrington, Northwood, Newmarket, Newington, Greenland, and Portsmouth, among others. In Maine, the company serves York, Eliot, Sanford, and Kennebunk, as well as additional communities in the greater Seacoast corridor, and it also extends service to Wolfeboro and Alton in the Lakes Region of New Hampshire.

The Rochester location places the team within accessible range of project sites across both states, allowing for in-person consultations, daily on-site presence during builds, and post-completion follow-up without the constraints typical of longer-distance contractors.

Premier Deck is a family-owned, Top Rated Local® custom deck builder based in Rochester, New Hampshire, serving the New Hampshire Seacoast and southern Maine since 2018. Specializing in custom composite and PVC decks, railings, pool decks, pergolas, helical pile foundations, and condo and commercial decks, the company pairs TimberTech Platinum installer status and NADRA membership with a five-year craftsmanship warranty and a one-year Deck Check inspection.
