

# High Quality Fence, Manteca's Family-Owned Fencing Specialist, Serves the Central Valley

*June 24, 2026*

MANTECA, CA - June 24, 2026 - PRESSADVANTAGE -

High Quality Fence, a family-owned fence contractor led by owner Moises Flores, has expanded its residential, commercial, and agricultural fencing services across California's Central Valley ahead of the 2026 building season. The company, based in Manteca and operating across San Joaquin County, also provides gate and deck services that support its core fencing work.

High Quality Fence holds California Contractors State License Board license number 1059161 and works with fencing and decking material brands that include CertainTeed, Bufftech, Trex, and TimberTech by AZEK. The company offers free estimates and provides material warranties of up to 15 years on fencing and up to 50 years on composite deck products.

Fencing is the company's primary line of work. High Quality Fence installs wood, ornamental iron, chain link, and vinyl fencing in privacy, security, pool, and agricultural styles for homes, businesses, and farms. Wood options such as cedar and redwood are available alongside lower-maintenance vinyl, iron, and chain link suited to the region's hot, dry summers, with each project matched to the property through layout, material selection, and code-aware installation.

"Fencing has always been the core of our business, and most of our projects are fence installation and repair for homes, businesses, and farms," said Moises Flores, owner of High Quality Fence. "Adding gate and deck work lets the company finish a project for the same customer, while fencing remains the focus."

Fence repair is part of the same line of work. The company handles inspection, component and structural repairs, repairs after storm or impact damage, and routine maintenance intended to extend the life of an existing fence rather than move directly to full replacement.

Gate work supports the company's fencing. High Quality Fence builds and installs swing, slide, cantilever,

pedestrian, chain link, and decorative gates, and installs LiftMaster operators and access control systems such as keypad entry, card readers, and intercoms, along with site assessment and permitting assistance. The gate is treated as part of the fence line so that entries match the surrounding fence.

The company also builds decks, with a focus on low-maintenance composite systems from Trex and TimberTech by AZEK. Configurations range from platform and raised decks to multi-level, pool, and covered decks, finished with composite surfaces, cable or wrought iron railings, and integrated lighting. Deck repair and maintenance are available, and pergolas and gazebos can be added to a deck or yard.

High Quality Fence operates from a single office in Manteca and serves San Joaquin County communities including Tracy, Lathrop, Ripon, Stockton, and Escalon, with additional coverage in Stanislaus, Sacramento, and Contra Costa counties. Working from one local base keeps the company close to its primary San Joaquin market and the residential, commercial, and agricultural customers it serves.

High Quality Fence is a family-owned, locally operated fence contractor based in Manteca, California, serving the Central Valley under owner Moises Flores. The company is licensed by the California Contractors State License Board, number 1059161, and focuses on residential, commercial, and agricultural fencing, with gate and deck services available.
