

Certified Across Four Decking Manufacturers, EJS Decks & Home Solutions Leads South Shore Outdoor Living and Whole-Home Construction

June 25, 2026

HANSON, MA - June 25, 2026 -

EJS Deck & Home Solutions is a South Shore construction company known first for custom decks and outdoor living, serving residential and commercial clients across Plymouth and Norfolk counties from offices in Hanson and Norwell. The company is certified across four decking manufacturer programs, and that specialty anchors a broader whole-home capability that extends the same in-house team to porches, pergolas, fencing, siding, roofing, and interior remodeling. Josh Steinman leads day-to-day operations and project management across every category, and the company provides free estimates and financing options throughout the region.

At its core, EJS Deck & Home Solutions builds its identity around custom deck and outdoor living construction. Deck projects span platform, raised, multi-level, freestanding, rooftop, pool, cantilevered, screened, and covered configurations, with privacy screens, skirting, and underdeck water management systems available to complete the build. Composite decking leads the material lineup, with Trex, TimberTech by AZEK, Deckorators, and Millboard installed alongside PVC and a full range of wood options for homeowners who prefer it. Deck framing is available in steel through Fortress Building Products, aluminum through TimberTech, composite through Owens Corning, and pressure-treated lumber through ProWood, giving each project a foundation matched to its design and exposure.

That same level of detail carries through the rest of the build. Railing systems are offered in composite, glass, vinyl, aluminum, steel, cable, and wood across Trex, TimberTech, Deckorators, Viewrail, Keylink, and Fortress. Deck lighting covers wiring, automation, and weather-resistant fixtures through In-Lite and Trex lighting systems. The outdoor living portfolio continues into pergolas through Struxure, Apollo, and Sundance; covered, screened, and three-season porches and sunrooms with EZ-Screen and SCREENEZE enclosures; custom gazebos; and wood, vinyl, ornamental, pool, and chain link fencing using CertainTeed and Trex

Fencing materials.

Because the work is handled in-house, homeowners who commission a deck can engage the same team for the larger project rather than sourcing a separate contractor for each phase. On the exterior, EJS Deck & Home Solutions installs vinyl, fiber cement, composite, cellular PVC, and cedar siding in lap, vertical, shake, board-and-batten, and shiplap profiles through James Hardie, LP SmartSide, CertainTeed, Ply Gem, and Georgia Pacific, and installs asphalt roofing systems through Owens Corning and CertainTeed. Interior work covers basement remodeling, from finished bonus rooms and entertainment spaces to wet bars and heated flooring, along with full bathroom renovations including walk-in and steam showers, custom glass surrounds, and tile work. The company manages permit acquisition, foundation work, 3D design rendering, material selection, and installation across each category.

The company's credentials reinforce its focus on the deck and outdoor living category. EJS Deck & Home Solutions holds certified status with four manufacturer programs across the composite decking and underdeck categories. As a Deckorators Certified Pro, it installs Deckorators composite decking, railing, and post cap accessories. As a Trex Certified Pro, it works with Trex composite decking, railing, and accessory systems, and its Trex Rain Escape certification covers the brand's gutter and channel underdeck water management system. As a TimberTech Certified Member, it installs TimberTech by AZEK composite decking, aluminum railing, and trim. The company is also a member of the North American Deck and Railing Association (NADRA), holds an A+ rating with the Better Business Bureau, and operates under Massachusetts Home Improvement Contractor registration number 201306 and Construction Supervisor License number 115352.
