

J&A Deck & Fence Marks a Decade of Custom Deck Construction

June 25, 2026

GERMANTOWN, MD - June 25, 2026 -

J&A Deck & Fence, a residential and commercial outdoor construction company led by owner Josh Arrington, has marked more than ten years of custom deck building and outdoor living construction across Montgomery County and the greater Washington Metro area. The company operates under Maryland Home Improvement Commission license MHIC #155198, keeps custom deck construction as its primary focus alongside fencing and outdoor living services, and manages each project from design through permitting and final walkthrough.

Arrington founded the company on a hands-on approach centered on precision, direct client communication, and accountability through each stage of construction. Over more than a decade of work across Montgomery County, he has built custom outdoor structures through the region's humid summers, freeze and thaw winters, and other Mid-Atlantic weather demands. That work has developed firsthand experience in deck design, structural framing, fence installation, and outdoor living construction that informs each estimate the company writes and each project its crew completes.

The decade mark reflects a steady evolution. The company grew from deck-focused beginnings into a broader outdoor construction operation, while keeping deck building at its center rather than diluting that focus across unrelated trades. "Reaching ten years across Montgomery County reflects a steady focus on quality construction and direct communication with each client," said Josh Arrington, owner of J&A Deck & Fence.

Custom deck construction remains the company's primary specialty. J&A Deck & Fence builds platform, raised, multi-level, freestanding, rooftop, pool, curved, cantilevered, screened, and covered decks engineered for Maryland's climate. Its lead materials are low-maintenance composite and PVC, drawn from manufacturer lines that include Trex, TimberTech by AZEK, Fiberon, Deckorators, Barrette Outdoor Living, MoistureShield, Duralife, Veka Deck, and TruNorth. For clients who prefer natural wood, the company also builds in pressure-treated lumber, cedar, redwood, and exotic hardwoods such as Ipe, Tigerwood, and Cumaru, with framing constructed in wood, steel, aluminum, or composite.

Each deck is finished with the structural and design details that complete it. Underdeck systems include panel, gutter-and-channel, snap-in, and Haven Underdecking configurations, while skirting ranges across lattice, board, stone and brick, faux stone, vinyl, and composite profiles. Railing systems are available in composite, glass, vinyl, aluminum, steel, cable, and wood through brands that include Trex, TimberTech, Deckorators, Fiberon, and Wolf. Integrated lighting, from ambient and stair fixtures to automation and weather-resistant upgrades, is installed through In-Lite and Tru-scapes systems.

The company also maintains existing decks through inspection, cleaning, sealing, staining, refinishing, restoration, additions, remodeling, and complete rebuilds, extending the service life of structures already in place.

Alongside its deck work, J&A Deck & Fence operates a fencing division for residential and commercial properties throughout Montgomery County. The division installs privacy, security, pool, agricultural, ornamental iron and aluminum, chain link, vinyl, composite, and wood fencing, with brand lines from CertainTeed, Master Halco Post Master+, Jerith, Bufftech, and Trex Fencing. Fence work spans site assessment, permitting, site preparation, excavation, post and gate installation, and ongoing maintenance such as cleaning, staining, sealing, painting, and inspection.

The company rounds out its outdoor living work with patios, pergolas, gazebos, porches, and sunrooms. Patios are constructed in natural stone, flagstone, gravel, and pavers across attached, covered, open, and multi-level layouts, with firepit and fireplace options. Pergolas and arbors range from traditional and attached to freestanding, gable, arched, and louvered designs through Struxure, Apollo, and Sundance, while porch work covers covered porches, screened-in porches, three-season rooms, and sunrooms built with

EZ-Screen, SCREENEZE, Universal Screens, Sun Coast, and Porch Windows Direct enclosure systems.

From its Germantown base, J&A Deck & Fence serves residential and commercial clients throughout Montgomery County, with coverage extending across Gaithersburg, Rockville, Potomac, Bethesda, Silver Spring, Clarksburg, Damascus, North Potomac, Olney, and Chevy Chase into the broader Washington Metro corridor. The company provides free estimates throughout its service area.
