## North Valley Solar Power Expands Solar Panel Installation Services for Davis Homeowners and Businesses

*June 25, 2026*

DAVIS, CA - June 25, 2026 -

North Valley Solar Power, a locally owned solar energy company headquartered at 720 Olive Drive in Davis, is reinforcing its commitment to clean energy adoption across Yolo County by offering full-service solar panel installation to residential and commercial property owners in Davis, Woodland, and West Sacramento. The company's goal is to make solar energy a practical and affordable choice for households and businesses working to reduce utility costs and support California's renewable energy targets.

As one of the established solar panel installers in Davis, North Valley Solar Power provides on-site consultations, custom system design, financing assistance, professional installation, and post-installation warranty service directly from its Olive Drive office. The company serves ZIP codes 95616, 95617, and 95618, covering neighborhoods including Central Davis, North Davis Farms, Wildhorse, Mace Ranch, Old North Davis, Davis Manor, Lake Alhambra Estates, and El Macero Estates.

Solar panel installation in Davis offers measurable financial and environmental returns. Eligible property owners may qualify for the federal Investment Tax Credit (ITC) and California's Net Energy Metering (NEM) program, which credits homeowners for excess electricity their systems send back to the grid. North Valley Solar Power walks customers through each incentive during the free consultation phase.

"Davis residents care deeply about sustainability, and our role is to make the switch to solar straightforward, transparent, and locally supported," said Chad Skinner, Office Manager at North Valley Solar Power. "Every property is different. We design each system around the home's roof orientation, shading, and the household's actual energy use, so the savings reflect real conditions, not estimates on paper."

The company follows a three-step process for new customers. Step one is a free consultation with a local solar expert by phone or in person. Step two is custom system design and a financing review. Step three is professional installation, tax credit documentation support, and activation of warranty coverage backed by industry partners including Tesla Energy, Sunrun, and Sunnova. Financing options are available through Travis Credit Union and other approved lenders.

The Davis team includes Office Manager Chad Skinner, Sales Manager Jake Bevans, Lead Installer Eric Taylor, and Lead Backup Battery and Main Panel Upgrade Installer Lance Clemens. North Valley Solar Power is a member of the Better Business Bureau and the local Chamber of Commerce.

Beyond standard rooftop solar panel installation, the company supplies solar inverters, solar battery storage systems, ground-mounted solar solutions, and main electrical panel upgrades. These options serve homeowners preparing for grid outages, expanding existing arrays, or pairing solar with electric vehicle charging.

The Davis office operates Monday through Saturday, 7 AM to 10 PM, and is closed Sunday. Free, no-obligation quotes are available by calling 530-564-3260 or visiting the company website. The office is reachable by Unitrans Bus Route O from downtown Davis and sits near the Davis Amtrak Station.

In addition to its Davis headquarters, North Valley Solar Power operates offices in Fairfield, Lodi, and Sacramento, giving the company a regional footprint across Northern California while keeping locally staffed teams in each service area.

About North Valley Solar Power

North Valley Solar Power is a residential and commercial solar energy company serving Davis, Woodland,

West Sacramento, and surrounding Northern California communities. The company specializes in custom solar panel installation, solar inverters, battery storage, system financing, and long-term warranty service. North Valley Solar Power is a Better Business Bureau member and a Chamber of Commerce member, and partners with Tesla Energy, Sunrun, Sunnova, and Travis Credit Union.
