

North Valley Solar Power Expands Local Solar Installation Services Across Chico

June 25, 2026

CHICO, CA - June 25, 2026 -

North Valley Solar Power, a Chico-based renewable energy company headquartered at 418 Broadway St, is reinforcing its commitment to clean energy adoption across Butte County by providing tailored solar installation services to homeowners and businesses throughout Chico, Oroville, Paradise, and the surrounding communities. The company aims to help local residents lower utility costs, reduce reliance on the grid, and contribute to a more sustainable Northern California.

As interest in residential and commercial solar continues to grow, North Valley Solar Power offers end-to-end support for every stage of the solar journey. The company's local services include free solar energy consultations, custom system design, system financing guidance, professional solar installation, and long-term warranty and service backed by a local team based in Chico.

"Every home and business has different energy needs, and a one-size-fits-all approach simply does not work for solar," said Jake Bevans, Sales Manager at North Valley Solar Power. "Our team begins each project with

a thorough energy assessment, then designs a custom system around the property, the budget, and the long-term goals of the customer. That is what local service should look like."

Solar installation in Chico requires a clear understanding of local regulations, roof conditions, weather patterns, and utility programs. North Valley Solar Power draws on years of experience in the region, supported by industry partnerships with Tesla Energy, Sunrun, and Sunnova for high-quality solar panels, inverters, and battery storage. Financing options are offered through partners including Travis Credit Union, helping make solar more accessible for households and small businesses across the area.

The company services a wide range of neighborhoods, including Downtown Chico, Bidwell Park, California Park, Chapmantown, Esplanade, Lindo Channel, Humboldt, Pheasant Run, and Oak Valley, along with surrounding communities in Magalia, Paradise, Thermalito, and Oroville. Service coverage includes zip codes 95926, 95928, 95973, 95929, 95969, 95965, 95966, 95967, and 95968.

Beyond installation, North Valley Solar Power places a strong focus on solar education. The team helps customers understand net metering rules in California, federal tax incentives, financing structures, and what to expect during and after installation. This emphasis on transparency is intended to give homeowners the information needed to make confident, informed decisions about going solar.

The Chico office operates from 7:00 AM to 11:00 PM, Monday through Saturday, with same-day consultations available across the service area. Customers can reach the local team directly at 530-804-5501 or by email at chico@northvalleysolarpower.com. Free quotes are available by phone or through the company's website.

North Valley Solar Power is a proud member of the Better Business Bureau and the local Chamber of Commerce, with additional offices in Yuba City, Auburn, and Rocklin. The Chico location is led by Office Manager Chad Skinner, with Eric Taylor serving as Lead Installer and Lance Clemens as Lead Backup Battery and Main Panel Upgrade Installer.

For homeowners and businesses evaluating solar installation in Chico, North Valley Solar Power offers a local, accountable team focused on long-term performance, quality equipment, and clear customer support from consultation through post-installation service.
