

North Valley Solar Power Reinforces Position Among Trusted Solar Panel Providers in Pleasanton, CA

June 25, 2026

PLEASANTON, CA - June 25, 2026 -

North Valley Solar Power, a locally operated solar company in Pleasanton, today highlighted its full range of residential and commercial solar services available to homeowners and businesses across the Tri-Valley region. The update underscores the company's ongoing commitment to serving Pleasanton, CA and surrounding communities with locally installed, right-sized solar energy systems.

Based at 4695 Chabot Drive, Suite 200-C, Pleasanton, CA 94588, North Valley Solar Power offers solar energy consultations, custom system design, professional installation, financing assistance, and warranty support. The company is staffed by NABCEP-certified solar designers and California-licensed installation crews employed directly by the company, not subcontractors.

As one of the established solar panel providers serving the Tri-Valley, North Valley Solar Power focuses on system sizing aligned with each property's actual energy use. The team evaluates historic PG&E billing data, roof orientation, shade patterns, and planned additions such as EV chargers, pools, and home

expansions before designing a system. The approach is intended to help customers avoid oversized installations that may underperform under Pacific Gas & Electric's current Net Energy Metering 3.0 guidelines.

"We live in the same neighborhoods we serve, so we understand what Pleasanton homeowners are dealing with when it comes to PG&E billing, permitting timelines, and roof conditions," said a North Valley Solar Power representative. "Our job is to deliver a clear quote, a right-sized system, and an installation that holds up over time."

The company manages the full project lifecycle, including free on-site evaluation and quote, custom system design by in-house engineers, permitting through the City of Pleasanton Building and Safety Division, PG&E interconnection and NEM application filing, installation and inspection, Permission to Operate (PTO) coordination, and real-time performance monitoring with ongoing support.

Product offerings include Tier 1 solar panels, solar inverters, and solar battery storage systems. North Valley Solar Power partners with Tesla Energy, Sunrun, Sunnova, and Travis Credit Union for equipment and financing options. The company is also a member of the Better Business Bureau.

Service coverage from the Pleasanton office extends to Dublin, Livermore, San Ramon, Castro Valley, and Sunol. Within Pleasanton, the team supports neighborhoods including Ruby Hill, Castlewood, and Vintage Hills, and operates across zip codes 94566 and 94588.

The renewed focus on local visibility comes as Pleasanton-area homeowners continue to evaluate solar adoption under updated California net metering rules. North Valley Solar Power positions itself as a solar company in Pleasanton that responds quickly because its installers, designers, and project managers all work locally. Faster permitting coordination with city inspectors and PG&E is a direct outcome of that proximity, often reducing project timelines compared with national chains.

"Going solar should be straightforward," the representative added. "We give homeowners and businesses the information they need to decide, whether or not they choose us."

Free consultations are available by phone or in person at the Pleasanton office. Business hours are Monday through Saturday, 7:00 a.m. to 10:00 p.m. The team also provides guidance on available federal and state solar incentives, tax credits, and financing options through partner lenders.

About North Valley Solar Power

North Valley Solar Power is a California-licensed solar company in Pleasanton, CA serving residential and commercial customers across the Tri-Valley and East Bay. The company provides solar energy consultation, custom system design, professional installation, financing, battery storage, and ongoing local service. With NABCEP-certified designers, in-house installation crews, and direct relationships with PG&E and local permitting offices, North Valley Solar Power focuses on delivering right-sized solar energy systems backed by local warranty support.
