

Lund Dental Associates Emphasizes Comprehensive Dental Care Approach for Stoneham Community

June 25, 2026

June 25, 2026 - PRESSADVANTAGE -

Lund Dental Associates, a family dentistry practice serving the Stoneham, Massachusetts area, continues to prioritize comprehensive oral health care through an integrated approach combining preventative and restorative treatments. The practice, led by Drs. Cara A. Lund, William C. Lund, Marc E. Pearlstein, and Laura Rushford, maintains its commitment to delivering quality dental care in a welcoming, stress-free environment for patients throughout the region.

The dental practice has established itself as a cornerstone provider of oral health services in the community, offering everything from routine cleanings to advanced restorative procedures. As a leading Dentist in Stoneham, the practice serves patients from surrounding areas including Wakefield and Reading, providing comprehensive examinations that include oral cancer screenings, periodontal evaluations, and orthodontic assessments.

"Creating a stress-free environment while delivering comprehensive dental care remains central to our practice philosophy," said Dr. Cara A. Lund, lead dentist at Lund Dental Associates. "Every patient deserves access to quality oral health services that address both immediate needs and long-term wellness, which is why we maintain such a broad spectrum of treatment options under one roof."

The practice's emphasis on Preventative Dental Care forms the foundation of its treatment approach. The team provides regular cleanings, fluoride treatments, dental sealants, and extensive patient education on proper oral hygiene techniques. These preventative measures help patients avoid common dental problems including gum disease and cavities, potentially reducing the need for more extensive treatments in the future.

Complementing its preventative services, Lund Dental Associates offers comprehensive restorative dental services including dental fillings, crowns, bridges, root canals, and tooth extractions. The practice utilizes tooth-colored fillings and onlays, and has invested in technology that enables the creation and placement of dental crowns within a two-hour appointment window. The practice also stands behind its restorative work with a five-year warranty on crowns, veneers, and bridges, provided patients maintain their recommended

continuing care schedule.

Beyond traditional dental services, the practice has expanded its offerings to include cosmetic smile rejuvenation, Invisalign clear aligner therapy, dental implants, periodontal therapy, and teeth whitening procedures. This comprehensive service menu allows patients to receive virtually all their dental care needs at a single location, eliminating the need for referrals to multiple specialists.

The practice's commitment to patient comfort extends beyond its treatment offerings. The team has created an environment designed to reduce dental anxiety, recognizing that many patients experience stress when visiting dental offices. This approach has helped establish long-term relationships with families throughout the community, with multiple generations often receiving care at the practice.

Lund Dental Associates operates Monday through Thursday from its location at 2 Main Street in Stoneham. The practice accepts various insurance plans and offers multiple payment options to ensure dental care remains accessible to community members. The team regularly participates in community events and maintains an educational blog to help patients stay informed about oral health topics.
