

Tom's Mulch Fence & Deck Marks 40 Years in Business

June 25, 2026

SUGARCREEK TOWNSHIP, OH - June 25, 2026 -

Sugarcreek Township, Ohio. Tom's Mulch Fence & Deck, a fence, deck, and outdoor living contractor based at 2107 Ferry Rd, is marking more than 40 years in business, a milestone the company has reached while broadening its work from fencing into custom deck and outdoor living construction across the Miami Valley region of Ohio.

Owned by Judd Powell, the company has completed over 3,000 projects for residential, commercial, and agricultural property owners in Sugarcreek Township and the surrounding communities. Fence installation has remained the core of the business throughout that period, with crews managing each project in-house, from the first consultation and design conversation through permit acquisition, site preparation, excavation, post setting, and gate installation, so that a single team handles a project from start to finish.

"Reaching four decades in business reflects steady relationships and projects that hold up over time," said Judd Powell, owner of Tom's Mulch Fence & Deck.

The company's fencing covers residential yards, commercial sites, and temporary needs. Homeowners commonly request privacy and pool fences, security fencing suits business properties, and split rail and farm fencing serve larger lots and acreage. Material options include wood and redwood, vinyl, composite, chain link, ornamental iron, ornamental aluminum, and welded wire mesh, with farm and ranch work that ranges from rail fencing and woven wire to horse, cattle, and paddock fencing, and each fence is sized and styled to the property rather than drawn from a fixed menu.

Gate work is a related part of the business, with gates fabricated and installed for both homes and commercial sites in styles that range from walk gates to wider drive gates, along with hardware, safety features, and permitting support. Fence repair addresses inspection, component replacement, and general fixes for aging or damaged fences. The company also builds retaining walls in concrete, stone, and brick for residential and commercial sites, helping property owners manage grading, terracing, and slope stabilization

as a structural complement to their fencing.

Over the past several years, the company has placed growing emphasis on decks and outdoor living. Tom's Mulch Fence & Deck builds custom decks along with pergolas, cabanas, carports, porches, sunrooms, gazebos, patios, outdoor kitchens, and firepits. A 3D design and rendering step lets property owners preview a project before construction begins, a process the company uses to plan layout and material choices in advance.

Decking projects use composite and synthetic material lines from manufacturers such as Trex, Fiberon, TimberTech by Azek, Deckorators, and Barrette Outdoor Living, while fencing draws on manufacturers including CertainTeed, Bufftech, Jerith, Ameristar, and SimTek. The company's installed work is backed by manufacturer warranties, including a limited lifetime warranty on aluminum fencing.

"The move into decks and outdoor living grew out of what customers were already asking for," Powell said. "Many wanted one contractor to handle the fence, the deck, and the space in between."

Tom's Mulch Fence & Deck operates Monday through Friday from its location at 2107 Ferry Rd in Sugarcreek Township, serving Greene County and the broader Miami Valley. More information about the company and its services is available at the company's website.
