

WJC Decks and Remodeling Focuses on Composite and PVC Deck Construction

June 25, 2026

ANDOVER, MN - June 25, 2026 -

A composite and PVC deck and outdoor living specialist in Anoka County, WJC Decks and Remodeling pairs its deck-building core with full exterior remodeling handled by one in-house team.

WJC Decks and Remodeling, a family-owned composite and PVC deck builder based in Andover, Minnesota, has centered its practice on custom deck construction supported by single-contractor exterior remodeling. Owned by Phil Haluptzok, the company serves homeowners across Anoka County and the north-metro Minneapolis area. It has completed over 600 projects since 2016, and its identity starts with the deck and extends outward into the rest of the home's exterior.

The company builds residential and commercial decks in platform, raised, multi-level, freestanding, rooftop, pool and spa, curved, cantilevered, screened, and covered configurations, with privacy screens part of the standard scope. The workflow runs from deck design and consultation through footing installation, framing, permit acquisition, and construction, and it also covers rebuilds, additions, resurfacing, and repair. Decking is composite and PVC, specified as TimberTech by Azek, consistent with the company's TimberTech Gold Pro installer status and its membership in the North American Deck and Railing Association.

Framing systems use wood, aluminum, and PWT pressure-treated LVL, supported by ProWood pressure-treated lumber, TimberTech Aluminum, and PWT Lumber. Footings are set on helical piers or diamond piers, the foundation systems Minnesota frost depths typically require on raised and elevated builds. Under-deck systems include the Trex RainEscape and Zip-Up Deck Drainage System, which convert the area below a raised deck into dry, usable space with full water management.

Railings span composite, glass, aluminum, and cable systems, with TimberTech, Westbury, and Hideaway as supporting brands, and deck rerail is part of standing scope. Deck lighting work includes design consultation and installation of post cap, rail, and step lights, with TimberTech and Westbury as supporting brands.

Skirting options include lattice, solid wood panels, horizontal or vertical boards, stone or brick, and composite finishes.

The outdoor living scope extends beyond the deck surface. Pergolas are built in attached, freestanding, louvered, and fixed-louvered styles with StruXure brand support. Porch construction covers covered porches, screened-in porches, three-season rooms, and sunrooms, with enclosure systems from Sunspace Windows and SCREENEZE and footings set on helical or diamond piers. Patios are built in concrete, stamped concrete, composite, PVC, and other surfaces in covered and open layouts, and privacy screens and walls are available in composite and aluminum.

A deck project in Anoka County rarely stays inside its own scope. Old siding often has to be cut back where a ledger board meets the house, soffit and fascia sometimes need replacement, and older windows near a new deck level are frequently replaced at the same time. Coordinating several contractors across overlapping work is the part of a remodel that most often goes wrong, and it is the reason the company keeps the surrounding exterior under one team.

That supporting capability includes roofing, siding, vinyl window and exterior door replacement, concrete work, garage construction, home additions, and storm damage repair, with manufacturer brand support from GAF, Owens Corning, Andersen, Pella, JELD-WEN, ProVia, and Plygem. For a deck client, the work that touches the house around a new deck stays with the same crew rather than splitting across vendors.

WJC Decks and Remodeling is family-owned and operated, with over 600 completed projects since 2016 and TimberTech Gold Pro installer status. The company's work is backed by manufacturer warranties on the products it installs.

About WJC Decks and Remodeling

WJC Decks and Remodeling is a family-owned custom deck builder and exterior remodeling contractor based in Andover, Minnesota, owned by Phil Haluptzok. The company specializes in composite and PVC deck construction and outdoor living, including screened porches, sunrooms, patios, and pergolas, and supports that core with roofing, siding, window and door replacement, concrete work, and home additions. It serves Andover and the north-metro Minneapolis region from 4672 166th Ave NW, Andover, MN 55304.
