

Go Industries Inc Introduces Heavy-Duty Shovel Baskets for Work Trucks

July 10, 2026

Richardson, TX - July 10, 2026 -
Go Industries Inc, a Richardson, Texas-based manufacturer of truck accessories and law enforcement equipment, has introduced heavy-duty shovel baskets designed specifically for work trucks and commercial vehicles. The new storage solution addresses the common challenge of organizing and securing shovels and similar tools during transport.

The shovel baskets feature perforated metal construction that allows dirt and debris to fall through, preventing accumulation within the storage unit. Measuring 72 by 18 by 10 inches, the baskets provide ample space for multiple shovels while maintaining a compact profile that maximizes truck bed utility. The products are available in both white and black finishes to complement various vehicle aesthetics.

"Work truck organization remains a critical factor in operational efficiency for contractors, utility companies, and municipal services," said a Go Industries spokesperson. "These baskets represent our commitment to developing practical solutions that address real-world challenges faced by professionals who rely on their

vehicles as mobile workstations."

The perforated metal design serves multiple purposes beyond debris management. The construction allows for proper ventilation, reducing moisture buildup that can lead to tool corrosion. Additionally, the open design enables operators to quickly assess tool inventory without removing items from storage. The perforated sides facilitate drainage during wet conditions, extending the lifespan of both the storage unit and the tools contained within.

Go Industries manufactures the baskets in the United States, maintaining quality control throughout the production process. The company designed the units for straightforward installation, allowing fleet managers and individual operators to equip their vehicles without extensive modification or specialized tools. The mounting system accommodates various truck bed configurations, providing flexibility for different commercial vehicle models.

The introduction of these storage solutions aligns with increasing demand for organized truck bed accessories as more industries recognize the productivity benefits of systematic tool management. Construction crews, landscaping companies, utility workers, and emergency response teams frequently require immediate access to shovels and similar implements while maintaining secure transport between job sites.

The baskets complement Go Industries' existing line of truck accessories, which includes grille guards, bumper replacements, headache racks, and mud flaps. This expansion into specialized storage solutions reflects the company's response to customer feedback and market analysis indicating a need for durable, purpose-built tool organization systems.

Since 1978, Go Industries Inc has manufactured truck accessories and specialized equipment for law enforcement and commercial applications. The company holds Platinum Status with SEMA and operates from its facility in Richardson, Texas. In addition to standard product lines, Go Industries offers custom manufacturing services for organizations requiring specialized vehicle equipment solutions. The company's product portfolio encompasses front and rear truck protection systems, law enforcement vehicle equipment, and custom-engineered solutions for commercial fleet applications.
