

Website Redesign Completed For Urgent Care Clinic In Rocklin CA

May 02, 2016

May 02, 2016 - PRESSADVANTAGE -

Jucebox Local Marketing Partners, a local marketing and website design company in Roseville, CA, has recently completed a full website redesign for Turnure Medical Group, a full service medical group and urgent care clinic in Rocklin, CA. The website is now mobile responsive and provides easy access to information for new and returning patients. The new website can be accessed through turnuremedicalgroup.net.

Camie Turnure, CFO and Business Operations Manager of Turnure Medical Group, Inc., says: "We felt it was time to have our website redesigned. While we did have a basic website, it was no longer acceptable at this time when easier access, including access for mobile devices, has become essential. In working together with Jucebox Local Marketing Partners, we have been able to make our site up-to-date and we couldn't be happier with the results."

Jucebox Local Marketing Partners took the brief on with gusto. They transformed Turnure Medical Group's website from a basic, informative site, to a responsive, interactive location for people and professionals alike to receive important information about urgent care and other services offered. Jucebox, as can be seen on their website at <http://juceboxlocalmarketingpartners.com/services-we-offer/web-design/>, is committed to

building effective websites and this is what they feel they have achieved here.

"We asked Jucebox to pull out all the stops and be the best they could be," adds Camie Turnure. "They didn't disappoint! Our site looks fantastic and can now be used on mobile devices as well, which has made a huge difference. Many of our patients have already commented on how great it looks, and that is really all that we could have asked for." Patients are also encouraged to visit us on Facebook. Our Facebook page offers patients and professionals alike an opportunity to communicate and network together, as well as to ask questions for Turnure Medical Group. Furthermore, it is an opportunity for the clinic to share industry relevant news.

Not only has Jucebox redesigned the clinic's website, they have also engaged in other online marketing efforts for them. As part of that, they have also made enhancements to their related business website, La Bella Vita Medi Spa. Patients looking for cosmetic procedures are invited to visit them there.
