

Dinardo Tree Care Expands Certified Arborist and Tree Pruning Services Across Dallas Metropolitan Area

July 21, 2026

Dallas, TX - July 21, 2026 -

Dinardo Tree Care, a certified tree care company serving the Greater Dallas area, announces the expansion of its comprehensive arborist services to meet growing demand for professional tree maintenance across Dallas, Highland Park, Preston Hollow, Lake Highlands, Lakewood, Coppell, and Highland Village.

The expansion comes as property owners increasingly recognize the importance of professional tree care for maintaining property values and ensuring tree health. The company's ISA-certified arborists, holding certification number TX-4666A, provide specialized services including tree pruning, deep root fertilization, air spading, storm damage recovery, tree support systems, healthcare and diagnosis, insect and disease control, water management, and tree and stump removal.

"As urban forests face increasing environmental stresses, professional tree care has become essential for maintaining healthy trees," said Jared Dinardo, ISA Certified Arborist at Dinardo Tree Care. "Our expansion allows us to bring certified expertise to more communities, ensuring trees receive the specialized care they

need to thrive in North Texas conditions."

The company follows strict ANSI A300 Tree Care Standards, which serve as the final authority in the US Civil Court system and represent the highest industry benchmarks for tree care practices. This commitment to standards ensures that all work performed meets or exceeds professional requirements for safety and tree health.

As an arborist highland park residents have relied on for years, the company has developed deep expertise in addressing the specific challenges faced by trees in the Dallas metropolitan area, including drought stress, soil compaction, oak wilt, and storm damage. The expansion enables more property owners to access these specialized services.

The company's approach emphasizes organic treatments and proven techniques that promote long-term tree health rather than quick fixes. Services range from selective pruning that maintains tree structure and health to comprehensive healthcare programs that address insects, diseases, and nutritional deficiencies.

"Proper tree care is an investment that pays dividends through increased property values, energy savings from shade, and enhanced environmental benefits," added Dinardo. "Our certified arborists develop customized care plans for each property, considering factors such as tree species, age, location, and specific health concerns."

For tree pruning highland park property owners particularly benefit from the company's expertise in maintaining the mature tree canopy that characterizes many established neighborhoods. Regular professional pruning helps prevent storm damage, removes hazardous branches, and promotes healthy growth patterns.

The expansion includes enhanced capabilities for emergency storm damage response, a critical service given North Texas's severe weather patterns. The company's arborists assess storm-damaged trees for safety and viability, providing removal services when necessary and recovery treatments for trees that can be saved.

Dinardo Tree Care specializes in maintaining overall tree health and wellness through organic treatments, proven techniques, and certified training. The company serves both commercial and residential clients throughout the Greater Dallas area, offering comprehensive tree care services that range from routine maintenance to complex diagnostic and treatment programs. With a focus on all-natural tree care, growth, and wellness, the company has established itself as a trusted provider of professional arborist services in

North Texas.
