

AccuTemp Cooling and Heating Announces Expanded HVAC Repair Services Across Northwest Louisiana

July 21, 2026

Shreveport, Louisiana - July 21, 2026 -

AccuTemp Cooling and Heating, a leading heating, ventilation, and air conditioning contractor serving northwest Louisiana since 2004, announced today the expansion of its comprehensive HVAC services for Bossier City and surrounding communities. The expansion addresses growing demand for professional climate control solutions as the region experiences increasingly variable weather patterns and aging HVAC infrastructure requires more frequent maintenance.

The expansion comes as demand for professional HVAC services continues to rise across the region. Recent industry data indicate that properly maintained HVAC systems can reduce energy consumption by up to 30 percent while significantly extending equipment lifespan. AccuTemp's comprehensive service offerings include heating repair and maintenance, commercial HVAC system servicing, advanced carbon monoxide detector installation, and reliable home backup generator solutions.

The company's expanded service coverage now encompasses Shreveport, Bossier City, Benton, Stonewall,

Haughton, Princeton, Oil City, Mooringsport, Keithville, and surrounding areas throughout northwest Louisiana. This strategic expansion enables AccuTemp to provide faster response times and more comprehensive coverage for both residential and commercial clients requiring air conditioning installation and repair services.

"With over 40 years of combined experience in the HVAC industry, our team recognizes the critical importance of reliable climate control systems for both homes and businesses throughout northwest Louisiana," said Duane Simpson, Service Manager at AccuTemp Cooling and Heating. "Our expanded service area allows us to bring professional HVAC solutions to more communities while maintaining our commitment to rapid response times and quality workmanship."

Beyond traditional HVAC services, the company has invested in advanced diagnostic equipment and ongoing technician training to address evolving industry standards and increasingly sophisticated climate control technologies. The company maintains certifications to work with major manufacturers, including Carrier, Lennox, Coleman, Trane, Day & Night, and American Standard, ensuring compatibility with virtually any existing system.

AccuTemp's 24/7 emergency repair services have become particularly valuable for area businesses and homeowners facing unexpected system failures. The company's rapid response capability, combined with its extensive parts inventory and experienced technicians, minimizes downtime and discomfort for clients experiencing HVAC emergencies.

The expansion also includes enhanced commercial HVAC capabilities, addressing the unique needs of businesses requiring consistent climate control for operations, inventory protection, and customer comfort. Regular maintenance programs help commercial clients avoid costly emergency repairs while maximizing energy efficiency and equipment longevity.

AccuTemp Cooling and Heating maintains an A+ rating with the Better Business Bureau and offers comprehensive warranties on all work performed. The company provides free estimates on new and replacement heating and cooling systems, along with flexible financing options to make essential HVAC services accessible to all area residents and businesses. Since its founding in 2004, AccuTemp has established itself as a trusted provider of heating, ventilation, and air conditioning solutions throughout northwest Louisiana, combining technical expertise with a commitment to customer service and community support.
