DuraShield Roofing & Contracting Completes First Habitat for Humanity Project of the Year

June 30, 2026

NEENAH, WI - June 30, 2026 -
DuraShield Roofing & Contracting completed its first Habitat for Humanity project of the year in the Fox Cities area. The company contributed full roofing services, including materials and installation labor, to support the construction of an affordable home for a local family. The initiative forms part of the firm?s established community partnership with Habitat for Humanity and reflects ongoing efforts to assist with housing needs in the regions served.

The project required the installation of a new roof designed to meet local building standards and withstand Midwest weather patterns, including variable temperatures, precipitation, and potential storm events. A properly installed roof delivers essential structural protection and long-term performance for the residence. DuraShield Roofing & Contracting assigned trained installation technicians to complete the work as part of the collaborative build process organized by Habitat for Humanity.

The company has partnered with Habitat for Humanity for multiple years. This marks the first such project completed in the current calendar year. Participation enables the firm?s team to apply expertise in residential roofing while contributing directly to community housing initiatives. DuraShield Roofing & Contracting

also maintains relationships with several other local organizations, including The Salvation Army, The Lamers Foundation, and Kicks 4 Kids.

DuraShield Roofing & Contracting provides a comprehensive range of residential and commercial roofing services across Wisconsin and Northern Illinois. The company handles full roof replacements, repairs, inspections, and storm damage assessments for multiple roof system types. These include asphalt shingles, metal roofing, slate, tile, EPDM, and TPO flat roofing systems. Additional capabilities cover DaVinci Roofscapes composite shake and slate products, which offer engineered durability for various applications. DuraShield also installs Brava Roof tiles in their composite cedar shake, slate, and barrel tile options

Installation Technicians participate in continuous training programs through established manufacturer partnerships with GAF, Owens Corning, DaVinci Roofscapes, and Brava Roof Tiles. This preparation supports consistent workmanship standards and provides access to extended warranties on both materials and labor. In storm-related situations, staff members conduct detailed assessments using photo and video documentation to help property owners navigate insurance claims processes accurately and efficiently.

"At DuraShield, giving back to the communities that support us is something we truly value," said Anthony Walsh, owner of DuraShield Roofing & Contracting. "Being part of a project that helps create a safe, stable place for a family to call home means so much to our team."

"A roof is more than shingles and nails ? it is protection, comfort, and peace of mind for the people who live there," added Walsh. "We are honored to play a part in helping make that possible for families through projects like this one with Habitat for Humanity."

Founded in 2003 by Anthony Walsh, DuraShield Roofing & Contracting originated from his background in roofing sales and Project Managment. Walsh studied business administration and marketing and launched the company with the goal of establishing dependable service standards in the industry. Kim Walsh joined the operations in 2008, contributing accounting and administrative expertise. The business initially operated in the Appleton and Fox Cities region before expanding its service territory.

Current coverage areas include Green Bay, De Pere, Milwaukee, and Madison in Wisconsin, along with Lake Forest, North Barrington, South Barrington, and Hawthorn Woods, Illinois. The company maintains an A+ rating with the Better Business Bureau and conducts all activities according to the core values of dependability, integrity, growth, and service. Manufacturer partnerships enable the firm to offer a variety of proven roofing solutions while supporting technician development through regular training sessions.

Community involvement continues as a consistent element of company operations. Participation in Habitat for Humanity builds allows DuraShield Roofing & Contracting to address local housing needs while

reinforcing relationships within the communities where its team lives and works. This latest project demonstrates the firm?s dedication to these efforts and sets the foundation for additional collaborations throughout the remainder of the year.
