

New Whole Coffee Beans That People Can Grind For Full Aroma Ready For Release

May 05, 2016

May 05, 2016 - PRESSADVANTAGE -

Phoenix Treasures LLC, a company dedicated to the love of coffee, based in Cape Coral, FL, is proud to announce that their Phoenix Rising Coffee is now ready for release. This outstanding private reserve blend of Colombian and Brazilian hand picked beans from Central and South America has a smooth and rich flavor with no acid after taste. People are already becoming interested in the small 1 lb bags. The coffee is available through <http://www.amazon.com/dp/B01ECMXVRU>.

Robert King, founder of Phoenix Treasures LLC, says: "We have created small batches of lovingly artisan roasted bags. This is done so that the beans reach the perfect state of readiness to release the most flavor. We then ensure that the freshly roasted coffee beans are immediately packaged after roasting, thereby ensuring they stay fresh."

The Phoenix Rising Coffee is placed in special resealable bags with a valve, which allows for off gassing. This ensures that the coffee stays fresh, even after they have been opened. The product is fully FDA approved and has been designed to provide people with the most flavor, most aroma, smooth rich chocolate, nutty and citrus fruit notes. These are thick, rich, and full bodied that can be expected of a private reserve

blend.

"For us, coffee is also strongly about the aroma," adds Robert King. "We have added Phoenix Rising Coffee to our line of other coffee products, the Phoenix Coffee Grinder and the Phoenix French Press coffee brewer. Used together, people will be able to really bring out the aroma and flavors of the specialty blend." The French press and grinder are both available through the Phoenix Treasures website on www.phoenixtreasuresllc.com.

People are encouraged to like Phoenix Treasure's Facebook page on <https://www.facebook.com/Phoenix-Treasures-LLC-460358727476897>. Full details about existing and any new products are shared there. Additionally, the company has asked those who have tried the new coffee to post on the page to discuss their experiences with it, particularly if they have used it in conjunction with the company's grinder and French press. As their most premium product, they are very excited to hear about how it is being received.
