Crown Plumbing & Water Damage Restoration Expands Water Heater Replacement Services Across San Antonio

July 05, 2026

SAN ANTONIO, TX - July 05, 2026 -

Crown Plumbing & Water Damage Restoration has expanded its water heater services throughout San Antonio and Bexar County, adding specialized equipment and certified technicians to meet growing demand for energy-efficient heating solutions. The expansion includes enhanced capabilities for both traditional and tankless water heater installation, addressing the increasing number of homeowners seeking reliable replacements for aging systems.

The company, which has served the San Antonio area since 2006, reports a significant increase in requests for water heater replacements as older units reach the end of their service life. The expansion enables Crown to respond more quickly to both emergency replacements and scheduled upgrades, with technicians now equipped to handle a wider range of water heater models and configurations.

"San Antonio homeowners are increasingly recognizing the importance of proactive water heater replacement

before catastrophic failures occur," said Jeremy Newman, Director of Operations at Crown Plumbing & Water Damage Restoration. "Our expanded service capacity allows us to provide same-day assessments and installations, helping residents avoid the water damage that often accompanies sudden water heater failures."

The enhanced service offerings come as the company strengthens its position as one of the few San Antonio businesses combining full-service plumbing with in-house water damage restoration capabilities. This dual expertise proves particularly valuable when water heater failures result in flooding or structural damage, allowing Crown to address both the plumbing issue and any resulting restoration needs without requiring multiple contractors.

Crown's expanded water heater services include comprehensive diagnostics, removal of old units, installation of new systems, and proper disposal of replaced equipment. The company's technicians hold multiple certifications and licenses, including Plumbing License #RMP 13247, Mold Contractor License #RCO1696, and Asbestos Abatement Contractor License #801240.

The expansion also addresses the growing interest in tankless water heater installation among San Antonio residents seeking to reduce energy costs and maximize space in their homes. These on-demand systems require specialized knowledge and equipment for proper installation, capabilities that Crown has incorporated into its enhanced service offerings.

Beyond standard replacements, the company has expanded its capabilities in sewer line replacement services, recognizing the interconnected nature of residential plumbing systems. This comprehensive approach ensures that underlying plumbing issues are identified and addressed during water heater service calls, preventing future emergencies.

The company maintains partnerships with major insurance carriers, including USAA, Allstate, Farmers, Nationwide, State Farm, and Liberty Mutual, streamlining the claims process for water heater failures that result in property damage. Crown also offers financing options for homeowners facing unexpected replacement costs.

Crown Plumbing & Water Damage Restoration is a family-owned plumbing and restoration company serving San Antonio, TX and the surrounding Bexar County area since 2006. The company holds Plumbing License #RMP 13247, Mold Contractor License #RCO1696, and Asbestos Abatement Contractor License #801240, and offers 24/7 emergency plumbing and water damage restoration services. Crown works directly with major insurance carriers and has earned over 300 five-star reviews for its commitment to upfront pricing

and service with a heart.
