Crown Plumbing & Water Damage Restoration Announces Annual Disaster Relief Support Program for Families in San Antonio, TX

July 05, 2026

SAN ANTONIO, TX - July 05, 2026 -
Crown Plumbing & Water Damage Restoration today announced the launch of its annual disaster relief support program, committing to provide comprehensive restoration and plumbing assistance to one family significantly impacted by fire or major disaster each year. The initiative reflects the company's dedication to supporting the San Antonio community during times of crisis.

The program will provide complete restoration services at no cost to a selected family facing catastrophic property damage from fire, flooding, or other disasters. Services will include water damage restoration, fire damage restoration, mold remediation, and all necessary plumbing repairs and installations to restore the home to livable conditions.

"When disaster strikes, families often face overwhelming financial and emotional challenges," said Jeremy Newman of Crown Plumbing & Water Damage Restoration. "This program allows us to give back to our community by providing the full scope of our restoration and plumbing expertise to help a family rebuild their lives after experiencing devastating property damage."

The company's recent expansion of water damage restoration services and the opening of new locations on George Road in San Antonio and in Selma, Texas, have enhanced its capacity to respond to emergency situations throughout the greater San Antonio area. This expanded presence enables faster response times for both routine plumbing needs and emergency restoration services.

The selection process for the annual disaster relief recipient will consider factors including the severity of damage, family circumstances, and community nominations. Local fire departments, emergency services, and community organizations will be invited to submit nominations for families in need of assistance.

The comprehensive nature of the company's dual expertise in plumbing and restoration services proves particularly valuable in disaster situations. Water-related emergencies often require both immediate plumbing repairs to stop ongoing damage and extensive restoration work to address structural impacts, mold growth, and other secondary effects. Having both capabilities under one roof streamlines the recovery process for affected families.

"The efficiency of handling both the initial plumbing crisis and the resulting structural damage with a single provider significantly reduces the stress and complexity families face during recovery," added Newman. "Our integrated approach means faster restoration timelines and better coordination throughout the entire repair process."

The program builds upon the company's existing emergency response capabilities, which include 24/7 availability for urgent plumbing and water damage situations. The company's restoration division handles asbestos removal and testing, fire damage restoration, home remodeling and reconstruction, mold remediation and testing, sewage cleanup, and water damage restoration. The plumbing division provides installation, repair, water heater services, inspections and maintenance, and drain and sewer services.

Crown Plumbing & Water Damage Restoration serves the San Antonio metropolitan area with comprehensive plumbing and restoration services. The company specializes in both emergency response and preventive maintenance, offering integrated solutions that address immediate repairs and long-term property restoration needs. With multiple locations throughout the region, the company maintains rapid response capabilities for residential and commercial properties facing plumbing emergencies or disaster-related damage.
