

Perfect Catch Swimming Pool Repair, Gas, & Electric Expands Comprehensive Pool Services Across Pinellas County

July 05, 2026

LARGO, FL - July 05, 2026 -

Perfect Catch Swimming Pool Repair, Gas, & Electric has announced the expansion of its integrated pool, electrical, and gas services throughout Pinellas County, Florida, addressing the growing demand for comprehensive pool maintenance and renovation solutions from a single licensed contractor.

The Largo-based company distinguishes itself as the only contractor in Pinellas County holding four in-house trade licenses for pool, electrical, gas, and general contracting work. This unique combination allows property owners to complete complex pool projects through one company, eliminating the need to coordinate multiple contractors for pool construction services, electrical work, and gas line installations.

Perfect Catch's team of licensed professionals provides same-day service availability and upfront pricing across all service categories. The company maintains a 4.9 Google rating and operates without subcontractors, ensuring consistent quality control and accountability throughout each project phase.

"Property owners frequently face challenges when pool projects require multiple trades, leading to scheduling conflicts, warranty complications, and increased costs," said Yanni Ramos, President of Perfect Catch Swimming Pool Repair, Gas, & Electric. "Our integrated approach means that when a customer needs a heat pump installed, our team handles the electrical installation, connects the plumbing, and manages the gas line connection all in one visit, under one warranty."

The expansion includes enhanced capabilities for pool automation systems, variable speed pump installations, salt water chlorinator systems, and heat pump services. Additionally, the company offers specialized marine electrical services, outdoor living solutions, including pool deck remodeling and landscape lighting, and emergency electrical repair services.

As part of its commitment to comprehensive service delivery, Perfect Catch also provides pool leak detection, pool inspection services, and preventive maintenance programs. The company's electrical division handles everything from panel upgrades and surge protection to EV charger installations and generator services, while the gas division manages pool heater installations, gas line repairs, and appliance connections.

The company's expanded service offerings include comprehensive pool resurfacing services that address both aesthetic and structural concerns for aging pools. These services encompass tile and coping replacement, water feature installations, and complete pool remodeling projects. The expansion comes as many Pinellas County pools, particularly those built during the construction boom of the early 2000s, are reaching the age where resurfacing and major repairs become necessary.

The company serves all of Pinellas County, including Clearwater, St. Petersburg, Belleair, Dunedin, Palm Harbor, Seminole, Tarpon Springs, and surrounding communities. With the expansion, Perfect Catch aims to reduce project completion times and simplify the contractor selection process for both residential and commercial pool owners.

Perfect Catch Swimming Pool Repair, Gas & Electric is a licensed pool, electrical, and gas contractor serving Pinellas County, Florida. The company holds four in-house trade licenses and operates without subcontractors, offering pool repair, gas services, electrical work, and outdoor living solutions under a single warranty.
