# Multidisciplinary Care Models Simplify Patient Health at Dentist in Irvine, CA

*July 01, 2026*

IRVINE, CA - July 01, 2026 -

Navigating complex oral healthcare often requires patients to visit multiple specialist offices, causing fragmented care and increased anxiety. Blue Brush Dental addresses this challenge by providing a multidisciplinary approach to oral health, bringing general dentistry, advanced prosthodontics, root canal therapy, and oral surgery together under one roof. By combining diverse clinical skill sets in a single location, the practice simplifies the treatment journey for families and individuals seeking a dependable dentist in Irvine, CA. This collaborative model allows the clinical team to coordinate directly on complex cases, ensuring that patient care is unified, efficient, and highly personalized.

The foundation of this multi-specialty approach rests on a team of professionals with extensive clinical backgrounds and specialized training. Dr. Sean Chang, the founder and lead dentist at Blue Brush Dental, established the practice on principles of discipline and dedicated service, traits he honed during his time as a U.S. Army Tanker. After earning his dental degree from the NYU College of Dentistry and completing a residency at New York Presbyterian Hospital in Queens, Dr. Chang focused on creating a practice rooted in continuous learning. Today, he balances patient care with academia, serving as an Adjunct Assistant Professor at the USC Dental School to mentor the next generation of clinicians.

Working alongside him, Dr. Kathleen Nguyen emphasizes patient education and an artistic eye in restorative and cosmetic care, drawing on her background in biology and design. When cases require specialized tooth replacement or complex reconstructions, Dr. Eugene Kim provides board-certified prosthodontic expertise. A graduate and former instructor of the UCLA School of Dentistry, Dr. Kim also leads the Pacific Implant Academy, where he trains other dental professionals nationwide in advanced implant procedures. This dedication to education ensures the Irvine community has direct access to sophisticated restorative techniques.

For patients experiencing dental pain or requiring nerve-related interventions, Dr. Brian Chen offers precise endodontic care. Since joining the team in early 2022, Dr. Chen has utilized his specialized training from the USC Herman Ostrow School of Dentistry to manage intricate root canal treatments, focusing on patient comfort and predictable outcomes. When advanced surgical intervention is necessary, Dr. Jee Hoon Ha utilizes his unique background to treat complex structural issues. Dr. Ha, who transitioned from an electrical engineering and artificial intelligence research career to graduate from UCLA dentistry, completed an intensive residency at New York Medical College, qualifying him to perform intricate corrective jaw surgeries and facial trauma procedures.

By housing these distinct disciplines within a single facility, the practice eliminates the need for external referrals, reducing the stress and miscommunication often associated with modern healthcare. Residents looking for a qualified dentist in Irvine, CA, benefit from a multilingual staff capable of communicating clearly with a diverse population, further removing barriers to essential care. The physical space is designed to feel welcoming, replacing the traditional clinical coldness with an environment that promotes patient relaxation. Through shared knowledge and coordinated treatment planning, the clinical team ensures that every routine cleaning or advanced surgical procedure is handled with a unified medical perspective.

Blue Brush Dental is a full-service dental practice operating in Orange County, California, that provides general, cosmetic, and specialized oral healthcare. The practice utilizes a collaborative team of general dentists, a board-certified prosthodontist, an endodontist, and an oral and maxillofacial surgeon to deliver tailored treatments for patients of all ages.
